**VCS Solar Skylight**  
**Flat Roof**

### Main features
- Insect screen included as standard
- Interior white PVC frame
- Smooth profile grey aluminium capping
- 6 sizes available
- Solar panel and rain sensor
- Pre-installed electric motor, control system
- NEAT™ coating on outer pane

### Construction
- White PVC frame and sash components with extruded gaskets. White framed flyscreen as standard.
- VCS needs a custom-made flashing, preparation guide overleaf.

### Wireless control
- The VCS Skylight comes complete with a pre-paired radio frequency controller for your skylights accordingly.
- Stay in control: Use the app to operate your skylights and blinds using your smartphone.

### VELUX ACTIVE
- Indoor climate control (sold separately)
  - Sensor-based ventilation:
    - Smart sensors continuously monitor temperature, humidity and CO₂ levels
    - Water disperses evenly, sheets off, and evaporates quickly; thereby minimising water spotting on the pane.
- Smart sensors continuously monitor temperature, humidity and CO₂ levels
- Stay in control:
  - Use the app to operate your skylights and blinds using your smartphone.

### High Performance Double Glazing
- Outer – 3mm toughened® Low-E³ coated Cardinal glass.
- Cavity – 9mm sealed Argon gas space.
- Inner – 5.36mm clear laminated Cardinal glass (0.76mm PVB inter-layer).
- NEAT™ Coating on outer pane reduces cleaning frequency.
- Warm edge technology increases energy efficiency.

### Benefits:
- Radiant heat block: Complete window Glass only approx 75% Glass only approx 70% Glass only approx 99% 5 stars
- UV Harmful rays block
- WERS rating
- Double layer of Low-E³ coating
- 10 year warranty on insulated glass seal
- Reduced cleaning frequency

### Australian Standard AS1288
- Laminated glass (standard with VCS) must be used for skylights installed 3m or more above floor level.

### NEAT™ Photocatalytic Coating
- Silicone Dioxide/Titanium Dioxide coating reacts with the sun’s UV rays to decompose surface organic dirt before rinsing away with the next shower of rain, thereby reducing cleaning frequency.
- The coating also makes the glass surface smoother, so water disperses evenly, sheets off, and evaporates quickly, thereby minimising water spotting on the pane.

### Technical Values
- **U-value (W/m²K)**
  - Complete skylight: 2.91  
  - Glass only: 1.93
- **Solar Heat Gain Co-efficient**
  - Complete skylight: 0.24  
  - Glass only: 0.28
- **Visible Light Transmittance**
  - Complete skylight: 0.55
- **Luminous Efficacy (Ke = VT/SHGC)**
  - Complete skylight: 2.29
- **Sound Insulation (Rw)**
  - Complete skylight: 31dB

### Energy rating
- VELUX Skylights have been energy rated in accordance with the Skylight Energy Rating Scheme (WERS).
- **Maximum 5 stars Summer Ratings**
  - 4.5 out of 5 stars for Winter Rating
  - 4.5 out of 5 stars for Cool Daylight in Summer.

### CodeMark
- CodeMark is a voluntary certification scheme owned by the Commonwealth of Australia that provides legally binding evidence of compliance to the Building Code of Australia. One certificate replaces dozens of technical papers.

### Australian Standards
- VELUX Skylights are tested and approved to the appropriate Australian Standards.
- **AS4285 SKYLIGHTS**: Cyclonic & Non-Cyclonic
- **AS1288 OVERHEAD GLAZING**: Laminated inner pane
- **AS3959 BUSHFIRE**: Attack Level 40
- **AS1530.8.1: BCA BOUNDARY SEPARATION**
  - Class 1 & Class 10 buildings: Within 900mm of a boundary wall
  - Class 2 to Class 9 buildings: 3 metres from a boundary wall
- **AS4285 SKYLIGHTS**: Laminated inner pane

### Hailstone Test
- VELUX Simulated Tests†† ASTM E822-2009
- ** maximum 5 stars for hailstone Test**
  - 4.5 out of 5 stars for Winter Rating
  - 4.5 out of 5 stars for Cool Daylight in Summer.

### Separation requirements
- **Within 900mm of a boundary wall**
- **Class 1 & Class 10 buildings**
- **Class 2 to Class 9 buildings**: 3 metres from a boundary wall

### Separation requirements
- **AS1530.8.1: BCA BOUNDARY SEPARATION**
- **AS3959 BUSHFIRE**: Attack Level 40
- **AS4285 SKYLIGHTS**: Laminated inner pane

### Warranty
- **10 YEAR WARRANTY** on skylights and glazing
- **3 YEAR WARRANTY** on blinds, accessories & electric controls

---

**Notes**

- VELUX recommends VCS is installed with a slight pitch (e.g. 3°-5°) to help prevent condensation build-up and water ponding on the glass.
- VELUX recommends consultation with relevant authority before work commences. Skylight assessed in closed position.
- Roof pitch 0°- 60°: Skylight only. Custom-made flashing required. Skylight assessed in closed position; additional mesh protection may be required for opening apertures (consult local council). BAL assessed – based on VSS results. Skylight cannot be closer than 3m unless the boundary is adjoining a road or public place. Consult BCA for further details.
- @ Tests performed on skylight installed with 48 roofing screws (not screw provided).
- † CSIRO assessment report available on request. VELUX recommends consultation with relevant authority before work commences. Skylight assessed in closed position.
- ‡ See required installation method overleaf.
- # Based on RW value tested to A1276.1.
**Solar powered blinds**

The thermal performance of VCS Skylights can be enhanced with the inclusion of a blind. Tailor-made to fit perfectly to each size of skylight, they are easy to install and are supplied with aluminium side channels allowing blinds to be positioned at any point on the skylight.

No additional electrical control system required when adding blinds. (Blinds supplied with remote control).

**Honeycomb blinds**

- Adds a decorative effect.
- Colour: White on both sides.
- Materials: Double layered pleats (polyester) form a ‘honeycomb’ structure. Inner faces of honeycomb structure have aluminium coating.
- Near-total light reduction.
- Reduce heat by approx 60%.
- Easy to fit using VELUX Pick&Click! system.

Blinds sold separately.

**Important considerations**

- VELUX VCS Skylights can be used for flat and low sloping roofs. The low profile external covering and glazing seal prevents water infiltration even at 0°. To help prevent water ‘ponding’ on the glass a slight pitch (e.g. 3°-5°) is recommended.
- VELUX VCS does not come with a flashing kit but can be used with a variety of custom-made curb flashings. Contact VELUX or a local flashing manufacturer for more information.
- When installing VCS in an above/below combination, a minimum 250mm frame separation is required to allow clearance of the solar/rain sensor panel.

**Opening Restrictions**

BCA 2013 Vol 1 & 2 regulations (Prevention of Falls from Windows – Balustrades & Barriers): contact VELUX for information relating to restrictor devices for within-reach opening skylights.

**Preparation guide for custom-made flashing**

Throat on custom-made flashing must not exceed 38mm – otherwise Gypsum, when installed, will encroach upon glass area.

Skylight must be installed with timber base and Gypsum, as shown (typical installation), to achieve a 2.5 U-value rating.

**VCS – frame and glazing dimensions**
