

ELEVATION

Please note:
Skylights must be at a min. pitch of 15 degrees, and spaced 100mm apart for the channel section of the EKW combi-flashing to fit correctly.

Due to the design of Pressed Metal Tile roofing materials it is imperative that the roof battens are rebated 25 mm around the perimeter of the VELUX skylight, for the EKW combi flashing, to maintain aesthetics.

VELUX skylight with EKW flashing, installed to manufacturers installation instructions. Skylights must have a min. pitch of 15 degrees

CROSS SECTION A-A VSE and FS skylights and EKW combi flashing
