VELUX Australia
Throughout the construction industry, VELUX is a by-word for quality, a reputation that has been painstakingly built up for more than 35 years in Australia and for over 75 years around the world.

Perfectly designed to withstand the world’s harshest climatic conditions, all VELUX products are of the highest quality and will perform superbly for a lifetime of faultless service.

Take a look through this guide and judge for yourself. For range, quality, value, guarantees, delivery and service – VELUX is a world leader.

Guaranteed to last...

10 Year Warranty on all skylights, roof windows and flashings.

3 Year Warranty on accessories, including electric controls & blinds.

Code Mark® is a voluntary certification scheme owned by the Commonwealth of Australia that provides legally binding evidence of compliance to the Building Code of Australia. One certificate replaces dozens of technical papers.

Surpasses Australian tests for skylights

Cyclonic & Non-Cyclonic

Window Energy Rating Scheme (WERS)

(MAXIMUM 5 ON WERS SUMMER RATING)

Laminated inner pane

Australian Standard AS1288

Laminated glass (standard) must be used for skylights installed 3m or more above floor level.

NEAT™ Photocatalytic Coating

- Silicone Dioxide/Titanium Dioxide coating reacts with the sun's UV rays to decompose surface organic dirt before rinsing away with the next shower of rain, thereby reducing cleaning frequency.
- The coating also makes the glass surface smoother, so water disperses evenly, sheets off and evaporates quickly; thereby minimising water spotting on the pane.

NEAT™ Coating on outer pane reduces cleaning frequency.

Benefits:
- Radiant heat block:
  - Complete window approx 75%
  - UV Harmful rays block approx 99%
- Noise reduction factor 32 decibels
- WERS rating 5 stars
- Double layer of Low-E³ coating.
- 10 year warranty on insulated glass seal.
- Reduced cleaning frequency.

Smart indoor climate control

A healthier indoor climate. Automatically!

VELUX ACTIVE

Smart sensor based operation of your VELUX skylights and blinds.

with NETATMO

VELUX ACTIVE with NETATMO requires an iPhone or iPad, with iOS 9.0 or later. Android: Requires Android 5.0 and higher with access to Google Play.

VELUX with NETATMO

See page 5.

VELUX Skylights and Roof Windows are included in the National Energy Rating programme (AccuRate) as well as state run programmes such as Basix & FirstRate.

Building Code compliance

All VELUX Skylights/Roof Windows (except Sun Tunnels) are deemed non-combustible and thereby comply with BCA Fire Separation requirements i.e. suitable for use within 900mm of a boundary for buildings of Class 1 & 10 (typical residential dwelling)*.

* CSIRO assessment report available on request. VELUX recommends consultation with relevant authority before work commences. Opening models assessed in closed position.

* Skylight only. Custom-made flashing required. Tested in closed position, fire resistant mesh may be required for opening models. Rigid Sun Tunnel BAL29. Please consult your local council.

† Except GPL Roof Window and Sun Tunnel. VCS/VCM cyclone test not performed with screws provided, installation requires the use of #8 roofing screws.

Automatic sensor-based ventilation*

Solar-powered Skylight

- Solar panel mounted below the skylight provides all the power needed to operate the skylight.
- Rain sensor automatically closes skylight with on-set of rain.
- Battery power negates power surges and blackouts.
- Easy to install, no need for electrical wiring.

*Requires VELUX ACTIVE – sold separately (Page 5)
Pitched Roofs

VSS Solar-powered skylight
The ultimate skylight that provides abundant daylight and controllable ventilation. Features a solar panel that captures available daylight to recharge a highly efficient, concealed battery-powered operator and control system.

- Wireless installation. No electrician required.
- White painted interior timber frame and sash.
- Outer aluminium cappings (grey).
- Smooth profile sits lower in the roof, does not obstruct the roofline.
- Available in 9 sizes.
- Wall-mounted key pad.
- Rain sensor automatically closes the skylight when rain is detected.
- High Performance double glazing, with NEAT™ outer coating: reduces cleaning frequency.
- Includes removable insect screen.
- Complete with flushing for corrugated iron or tile roofs.

Also available

VSE Electrically operated

VELUX ACTIVE indoor climate control (sold separately)
- Sensor-based ventilation: Smart sensors continuously monitor temperature, humidity and CO₂ levels and open or close your skylights accordingly.
- Stay in control: Use the app to operate your skylights and blinds using your smartphone.

* For roofs below 15° pitch, VSS/VSE skylights need to be raised to 15° and custom flashed. VELUX can assist with technical advice and drawings. (NB: build-up not recommended in Bushfire areas.)

** VELUX recommends VCS is installed with a slight pitch (e.g. 5°-7°) to help prevent condensation build-up and water ponding on the glass.

† U-value (W/m²K) and SHGC data based on AFRC simulations, (complete skylight size; VSS/VSE: 1140mm x 1180mm, VCS: 1275mm x 1275mm).

‡ Solar Powered Blinds Blockout – DSH (for VSS/VSE), DSC (for VCS)
Honeycomb – FSCH (for VSS/VSE)
- All blinds are available in white. • Sold separately.
- Easy to fit using the VELUX Pick & Click!™ System.

Velux.com.au

Flat Roofs

VCS Solar-powered skylight
The ultimate flat roof skylight that provides abundant daylight and controllable ventilation. Features a solar panel that captures available daylight to recharge a highly efficient, concealed battery-powered operator and control system.

- Wireless installation. No electrician required.
- Maintenance Free – White PVC interior frame for a tough, hard wearing interior finish.
- Outer aluminium cappings (grey).
- Available in 6 sizes.
- Wall-mounted key pad.
- Rain sensor automatically closes the skylight when rain is detected.
- High Performance double glazing, with NEAT™ outer coating: reduces cleaning frequency.
- Includes removable insect screen.
- Requires custom-made flashing (not supplied by VELUX).

Also available

VSE Electrically operated

VELUX ACTIVE indoor climate control (sold separately)
- Sensor-based ventilation: Smart sensors continuously monitor temperature, humidity and CO₂ levels and open or close your skylights accordingly.
- Stay in control: Use the app to operate your skylights and blinds using your smartphone.

* For roofs below 15° pitch, VSS/VSE skylights need to be raised to 15° and custom flashed. VELUX can assist with technical advice and drawings. (NB: build-up not recommended in Bushfire areas.)

** VELUX recommends VCS is installed with a slight pitch (e.g. 3°-5°) to help prevent condensation build-up and water ponding on the glass.

† U-value (W/m²K) and SHGC data based on AFRC simulations, (complete skylight size; VSS/VSE: 1140mm x 1180mm, VCS: 1275mm x 1275mm) .

# Cyclone test not performed with screws provided, installation requires #8 roofing screws.

± Hailstone test not performed on solar panel. Solar panel not attached during test.

© Skylight only. Custom made flashing required. Skylight tested in closed position (VCS BAL assessed – based on VSS results), additional mesh protection may be required for opening apertures (consult local council). Roof pitch; VSS: 18°-60°, VCS: 0°-60°. Assessed in closed position.

See installation preparation guide on page 9.

**NB: BCA 2013 Vol 1 & 2 regulations (Prevention of Falls from Windows – Balustrades & Barriers): contact VELUX for information relating to restrictor devices for within-reach opening skylights.**
Outstanding daylight provision where extra ventilation is not required.

FCM SKYLIGHTS ARE IDEAL REPLACEMENTS** FOR ACRYLIC DOMES
10 sizes available to replace common acrylic dome sizes.

In simulated tests* VELUX skylights withstood hailstones, up to the size of cricket balls, launched at speeds experienced during heavy storms.

See Hail Storm case study. www.velux.com.au

** Custom-made collar adaptor (not supplied) required to fit.

*ASTM E822-2009 standard practice for determining resistance of Solar Collector Covers to Hail impact with propelled ice balls.
FS

Fixed (non opening)
Cost effective for creating light-filled rooms where adequate ventilation already exists. Energy efficient glazing and the use of blinds ensure heat transference is minimised.

- White painted interior timber frame.
- Outer aluminium cappings (grey).
- Complete with flashing for corrugated iron or tile roofs.
- High Performance double glazing as standard; with NEAT™ outer coating: reduces cleaning frequency.
- Smooth profile sits lower in the roof, does not obstruct the roofline.
- Available in 9 sizes.

Blinds for FS

Manual Honeycomb – FHCD
requires ZXT 200 rod control for out-of-reach.

Solar-powered Blockout – DSD
Solar-powered Honeycomb – FSCD
includes wireless, wall-mounted keypad.

- All blinds are available in white. • Sold separately.
- Easy to fit using the VELUX Pick & Click® System.

Solar Heat Gain Co-efficient† based on AFRC simulations. (Complete skylight size; FS: 1140mm x 1180mm, FCM: 1275mm x 1275mm).

Australian Standards

AS4285 AS1288 AS3959® AS1530.8.1

FCM

Fixed (non opening)
The brilliantly simple FCM flat roof skylight incorporates the VELUX High Performance double glazed, laminated unit and an all-metal exterior frame.

- Unlike acrylic or polycarbonate – laminated glass will not fade nor discoulour over time.
- The smooth exterior gives a lower profile on the roof.
- High Performance double glazing as standard; with NEAT™ outer coating: reduces cleaning frequency.
- Approx 99% UV Block.
- Available in 10 sizes.
- Maintenance-free anodized heavy-gauge aluminium frame.
- Requires custom-made flashing (not supplied by VELUX).
- Versatile positioning††: most sizes can be used in portrait, landscape or even “diamond shape” orientation.

Preparation guide for custom-made flashing

Timber curb must not exceed 38mm – otherwise Gypsum, when installed, will encroach upon glass area.
†Skylight must be installed with timber hob and Gypsum, as shown (typical installation), to achieve 2.9 U-value rating.

§ Skylight only. Custom-made flashing required. Roof pitch; FS: 18°-75°; FCM: 0°-60°.
†† FCM 2270 not recommended for “landscape” orientation.
Transform wasted attic space into fantastic loft living
GGL

Centre-Pivot roof window

Beautifully engineered for a lifetime of use, the GGL is ideal for within-reach attic situations.

- A short pull on the top control bar allows filtered background ventilation even while the window remains shut.
- A second pull on the control bar allows the window to rotate for maximum ventilation – and up to 180° for cleaning the outer pane from inside the room.
- Quality white painted pine sash & frame.
- Complete with flashing for corrugated iron or tile roofs.
- Available in 5 sizes.
- Laminated double glazing as standard.

GPL

Dual action roof window

Developed for use in attics with shallower pitched roofs to maximise roof top views. For within-reach situations only.

- Opens in two ways: the bottom handle allows for top-hung opening; a short pull on the top control bar allows filtered background ventilation even while the window remains shut.
- A second pull on the control bar allows the window to rotate for maximum ventilation – and up to 180° for cleaning the outer pane from inside the room.
- Quality white painted pine sash & frame.
- Complete with flashing for corrugated iron or tile roofs.
- Available in 5 sizes.
- Laminated double glazing as standard.
- Insect screen available as extra.

Blinds for GGL/GPL

- All blinds available in white
- Easy to fit using the VELUX® [Pick & Click] System
- Sold separately

NB: NEW VELUX blinds and flashings do not fit older Roof Windows. Contact VELUX to check availability of suitable blinds and flashings.

Opening Restrictors

BCA Vol 1 & 2 regulations (Prevention of Falls from Windows – Balustrades & Barriers): contact VELUX for information relating to restrictor devices for within-reach opening roof windows.

* For roofs below 15° pitch, roof windows need to be raised to 15° and custom flashed. VELUX can assist with technical advice and drawings. (NB: build-up not recommended in Bushfire areas.)
† U-value (W/m²K) and SHGC calculated according to EN 14351-1:2006 + A2:2016 (window size 1140mm x 1400mm).
§ Bushfire testing applicable to GGL in roof pitch 18°-75° and GPL in roof pitch 18°-55°. Roof window only. Custom-made flashing required. Roof window tested in closed position, additional mesh protection may be required for opening apertures (consult local council).
‡ Except Cyclonic.
†† Assessed in closed position.
VELUX Blinds – effective light control

VELUX has a choice of blinds that provide different levels of light control. Tailor-made to fit perfectly to each size of skylight or roof window, they are easy to install and are supplied with aluminium side channels that allow the blind to be positioned at any point down the window.

Blockout blinds

- Provide near complete blockout from light.
- Blind can be stopped at any position on the window.
- Reduce light by approx 100%.
- Reduce heat by approx 40%*.
- Available in white only.

Honeycomb blinds

- A stylish and modern blind providing protection from heat and glare while providing a near complete blockout from light. Manual or solar powered versions available.
- Honeycomb structured material.
- Reduce light by approx 95%.
- Reduce heat by approx 60%*.
- Available in white only.

**NB: NEW VELUX blinds do not fit older VELUX products. Contact VELUX to check availability of suitable blinds.
* Based on VELUX internal testing with 3076 model roof window.

NB: VELUX recommends retracting blinds during windy conditions if skylight is open.

Pick & Click!* system makes installing our blinds a snap!
Installation is simple if window is within easy reach.

^ Manual Blinds for Fixed Skylights require ZXT 200 rod control for out-of-reach situations.
**Solar powered blinds include wireless wall-mounted keypad (KLI 312).

Contact VELUX for information on blinds for FCM.
Sun Tunnels

Time-saving design

The VELUX Sun Tunnel has been designed to make installation quick and easy. Tube assembly is simple so little time is spent in the roof cavity.

The VELUX flexible (TWF) and rigid (TWR) Sun Tunnels provide installation flexibility. Rigid tunnels are most suited to roof spaces with minimal obstructions. They have a highly reflective shaft to achieve maximum light output. Flexible tunnels can be used when obstructions in the roof cavity prevent the use of rigid Sun Tunnels.

VELUX Sun Tunnels for pitched roofs are designed to provide natural light into corridors, stairwells, bathrooms and cupboards; where installation of a VELUX Skylight is not possible.

Product features:
- Choice of highly reflective rigid or flexible tunnel (350mm diameter, lengths vary – details on page 15).
- 4mm toughened external glass.
- Dual-layered ceiling diffuser – spreads light over an area of up to 9m².
- Interior diffuser with ‘Edge Glow’, a clear ring on the diffuser’s edge.
- Outer polyurethane cappings with integrated flashings for tiled/corrugated iron roofs.
- ‘Stay clean’ coating on glass exterior reduces cleaning frequency.
- Easier and quicker to install with VELUX Flexi Loc system. (TWR).

* Sun Tunnels are not suitable for roof pitches below 15°.
^ Bushfire testing applicable to roof pitches 18°–60°. TWR only.
Opening Skylights (pitched roofs)

15°-90° (VSS 15°-60°) Overall frame dimension w/h mm:

- Manual Page 7
