VELUX INTEGRA®
KSX 100K
1. Prepare the installation area by cleaning the roof tiles with a soft brush and a mild detergent.

2. Ensure the metal support is securely fixed to the roof using the appropriate screws and tools.

3. Attach the support to the roof with the provided clamps and bolts, making sure they are tightly secured.

4. Place the VELUX® window unit onto the support, ensuring it is level and stable. Adjust the position as needed to achieve the desired alignment.

5. Secure the window unit to the support with the provided screws, ensuring a tight and secure fit.

6. Complete the installation by following the manufacturer’s instructions for any additional components or fittings.
