The right blinds and shutters to go with the best roof windows

Whether you want to soften incoming daylight or block it out completely, our extensive range of blinds and shutters can offer you the ideal solution to suit your home and daylight control needs. Available in a wide array of styles and colours, you can be sure you will find the right VELUX blind or shutter for your home.

Many of our blinds also come in electric or solar powered operation, meaning with the use of a simple wall switch you can easily take control of the amount of daylight entering your space.
Why choose VELUX?

We manufacture the largest range of roof window blinds and shutters on the market, so you’ll be spoilt for choice. VELUX blinds and shutters are made especially for VELUX roof windows. They’re easy to fit and made for long-lasting and reliable performance.

The perfect blind for you
Controlling the amount of warmth and daylight in your home is key to achieving the perfect indoor environment. Your VELUX blinds are an important part of getting your indoor climate just right, giving you more flexibility and control over heat and light. From keeping your bedroom warm on chilly nights, to stopping your extension getting too warm on a sunny day.

A collection of colours
Whether you need light control, heat protection, a sophisticated look or a splash of colour, you are sure to find the right VELUX blind for your needs. Simply choose a great selection of colours and patterns that complement your room. From hidden cords and slim designs and OEKO-TEX® fabrics, our blinds have quality built in.

Comfort and convenience
You can choose from manual, solar powered or electric operation. Solar powered blinds are for solar powered VELUX INTEGRA® or manual VELUX roof windows and electric blinds are for VELUX INTEGRA® electric roof windows.

Smart indoor climate control
With smart, sensor-based operation, VELUX ACTIVE works together with your VELUX INTEGRA® electric or solar roof windows, blinds and shutters.

It’s all in the details
Our high performance blinds and shutters are built to last. They are rigorously tested to ensure flawless operation even after years of everyday use and exposure to the sunlight. For generations, VELUX engineers and designers have been perfecting our products and patented solutions. That’s why VELUX blinds and shutters are always the best choice for your VELUX roof windows.

Improving your home’s indoor climate

Your VELUX roof windows bring warmth and daylight into your home. Controlling these elements with the help of VELUX blinds and shutters is key to achieving an ideal indoor climate.

VELUX blinds and shutters provide extra insulation, daylight control and heat protection. In this way they can reduce your home’s energy consumption by minimising heat loss during the winter and heat gain on a hot, sunny day. With VELUX INTEGRA® solar or electric powered operation, you get the added convenience of a pre-paired wall switch to open and close easily.

External blinds and shutters

Awning blinds
- VELUX awning blinds control how much heat and light enters your home.

Roller shutters
- Roller blinds can be used to keep out the cold
- Offers total blackout, reducing solar heating by up to 94%.

See how you can control your indoor climate automatically with VELUX ACTIVE see p9

Improve insulation by up to 25% with VELUX blackout energy blinds

Reduce heat intake by up to 76% with a VELUX awning blind

Internal blinds

Blackout
- Blackout your bedroom for a great night’s sleep. Choose blackout energy blinds to reduce heat loss by up to 25%*

Light adjustment
- Diffuse daylight rather than block it out completely
- Choose VELUX roller blinds as a simple, stylish solution to soften incoming light and achieve basic privacy.

External blinds block heat from the sun’s rays before they hit the pane.

* The technical values of various accessories are determined through standardized tests and calculations, all in compliance with the international standards EN ISO 12567-2, EN 13363-2 and ISO 15099. Effect depends on type of roof window and glazing.

Please note that when blinds are rolled down the risk of condensation is increased. Therefore rolling up the blind after use and ventilating regularly is recommended.

Protect your home against the heat

Passive heating from the sun is a major benefit on a cold day, but can lead to overheating in warmer months. VELUX roller shutters can reduce the heat impact of the sun by up to 94%

Protect your home against heat loss

Although VELUX roof windows are well insulated, interior VELUX blackout energy blinds can further reduce heat loss by up to 25%*. This extra insulation is especially important on a chilly night during the winter months.

See how you can control your indoor climate automatically with VELUX ACTIVE see p9

VELUX awning blind block heat from the sun’s rays before they hit the pane.
VELUX INTEGRA® solar powered and electric blinds and shutters

New lower prices!

Adjust daylight and privacy in seconds

Enjoy more comfort with VELUX INTEGRA® blinds and shutters. Designed to work in harmony with your VELUX INTEGRA® solar powered and electric roof windows, these blinds are perfect for adjusting daylight in out-of-reach areas. VELUX offers a wide range of blinds for blackout, heat protection, insulation, privacy and decoration. All VELUX INTEGRA® solar and electric blinds come with a pre-paired wall switch for easy operation.

VELUX ACTIVE
For a smarter healthier home.

According to recent studies*, 90% of our time is spent inside, so maintaining a good indoor environment is more important than ever. We have partnered with revolutionary smart home company NETATMO to bring you a smart way to control your home’s indoor climate.

Smart sensors measure temperature, CO₂ and humidity levels. Once your chosen parameters have been set the system reacts, and operates your VELUX INTEGRA® products without you having to do a thing – adjusting them automatically to provide the right level of ventilation, light and heat.

The kit includes VELUX ACTIVE indoor climate sensor, VELUX ACTIVE departure switch and VELUX ACTIVE gateway.

Discover more at velux.co.uk/active

Apple HomeKit® compatibility lets you use voice control to operate your VELUX INTEGRA® products.

Sensor-based ventilation
Smart sensors monitor temperature, humidity and CO₂ levels and operate your roof windows accordingly for a healthier indoor climate.

Smart heat protection
Proactively closes any VELUX INTEGRA® blinds, awnings and shutters based on local weather forecast information, e.g. an increase in temperature.

Easy installation
You can easily set up and install VELUX ACTIVE without any professional assistance, however we’re always on standby if you need any further advice.

* Technical values are in compliance with EN ISO 12567-2, EN 13363-2 and ISO 15099. Effect depends on type of window and glazing.

Enjoy more comfort with VELUX INTEGRA® blinds and shutters. Designed to work in harmony with your VELUX INTEGRA® solar powered and electric roof windows, these blinds are perfect for adjusting daylight in out-of-reach areas. VELUX offers a wide range of blinds for blackout, heat protection, insulation, privacy and decoration. All VELUX INTEGRA® solar and electric blinds come with a pre-paired wall switch for easy operation.
Replace and upgrade. It’s just so easy!

Founded in 1941, VELUX is the original roof window manufacturer, giving us decades of experience. You can still order blinds that fit almost every generation of VELUX roof window. So whether you’re preparing for a renovation, conversion, relocation or would simply just like to change the look and feel of your room, a VELUX blind is the only choice for a reliable, quality operation.

You can even change your blinds when you change the function of the room to improve comfort for sleeping, playing, cooking, entertaining and much more! VELUX blinds come in such a wide variety of beautiful designs and patterns that you’re sure to find the perfect style upgrade for your space.
How to select and install your blinds

Selecting your VELUX blinds and shutters is easy. Just follow our simple five step process to get the perfect solution for you.

1. Find your window type and size
When you open your VELUX roof window you will find a data plate on top, either on the right or left hand side. Data plates differ in appearance depending on the age of your VELUX roof window.

- Find yours from the examples to the right. This will give you the correct type and size of your window model.

2. Select your blind type
You can choose an interior and/or exterior VELUX blind or shutter that meets your needs including blackout, light adjustment, heat control, or insect protection. Once you've selected your blind, see the relevant product pages for the code and price.

3. Select operation method
There are three operation methods to choose from. Manual blinds are a good option when your roof windows are within reach, while our electric or solar powered blinds are ideal for out-of-reach areas.

- Manual
- Remote control: electric
- Remote control: solar

4. Colour choice
VELUX blinds are available in a wide range of colours and designs. Each colour and design option has a unique code. Add this code on to your blind type and size when ordering your blinds.

See our full range of blinds or order colour swatches at veluxblindsdirect.co.uk

5. Installation
VELUX blinds and shutters are made to fit your VELUX roof windows perfectly. Our unique Pick&Click™ system means you can fit them in minutes. New VELUX roof windows are fitted with pre-installed brackets to ease installation and to ensure a perfect fit every time.
Product overview

With our extensive range of blinds and shutters, you can be sure to find the right solution for you. Select the perfect blind for your home and see the product pages for prices and colour options.

Venetian blinds
The best solution for bathrooms and kitchens

VELUX roof windows fill any room with natural daylight and plenty of fresh air. Areas like kitchens and bathrooms can generate high levels of moisture and benefit from added ventilation. VELUX Venetian blinds are an ideal solution for these areas as they are made from aluminium, making them easy to maintain.

• Cordless operation
Manually operated Venetian blinds are very easy to use. Unlike traditional Venetian blinds, the VELUX Venetian blind is cordless. You therefore adjust the blind using a control bar attached to the bottom of the blind.

• Moisture resistant and easy-to-clean
These moisture resistant blinds are easy-to-clean and come in 9 different colours to suit your personal style and decor.

• Privacy and style
With VELUX Venetian blinds you can have both privacy and light. Just tilt the slats in any direction to adjust the angle of the light and achieve the right amount of privacy.

The slats can be tilted separate to the blind moving from top to bottom.

Order your VELUX blinds and shutters online at veluxblindsdirect.co.uk
Roman blinds

Versatile and stylish

Enjoy a wide range of decorative solutions with VELUX Roman blinds. Explore the potential of beautiful fabrics and be inspired by the soft styling effects that make this collection refined and original. Should you want to add more personality to your room, VELUX Roman blinds come in a variety of colours and patterns.

• Versatile
The clever design of our Roman blinds mean you can easily swap the fabric in a matter of minutes – a perfect and easy way to update the room’s interior.

• Soft lighting effects
With flexible and stepless positioning, block direct sunlight and give your room a gentle glow as the Roman blinds softly diffuse light into the room.

Check your data plate to find the type and size of your roof window model.

All Roman blinds have a delivery time of up to 13 days.
Delivery time is in working days from receipt of orders placed before 4pm (UK) and 11.30am (NI).

Keep your options open with a blind you can easily swap over in a matter of minutes.
Roof windows offer twice the amount of daylight than vertical windows of the same size*. With all this added daylight however, it’s important to be able to protect your space from added heat from the sun. Take a look at our exterior heat protection sun screening products to help add comfort to your home.

Awnings and shutters
Exterior blinds for heat protection

**Awning blinds**
VELUX awning blinds provide solar heat reduction whilst ensuring you can maintain the view through your roof window.
- **Sun yes, heat no**
  - Reduce heat by up to 76%.
- **Quality**
- **Easy installation**
  - Install from the inside in minutes.

**Roller shutters**
From full daylight to complete blackout, VELUX roller shutters offer you additional energy saving and noise reduction.
- **Complete light control**
  - Keeps out the light and prevents overheating.
- **Energy saving**
  - Provides insulation in cold weather.
- **Security and noise reduction**
  - Provides additional security and protection from the elements.

**VELUX ACTIVE compatible**
Combine any external awning blind or roller shutter with an internal VELUX blind see pages 18-33.

**Check your data plate to find the type and size of your roof window model.**

- £6.00

* Electrically powered products combined with a manual VELUX roof window require a controller KUX 110.

** All awnings and shutters have a delivery time of up to 7 days except electric and solar shutters in size 5 and CX02 which are 15 days.

** VELUX roller shutter SSL is only compatible with VELUX roof windows produced after 2002.
Flat roof blinds

Heat and light control for flat roof homes

To control the amount of incoming light or to reduce the indoor temperature in the summer – there are some great options to complete your VELUX flat roof windows.

Pleated blind
Perfect for softening incoming daylight and adding a decorative touch, pleated blinds open and close with a handy pre-paired wall switch.

- Softly diffuses incoming light.
- Enables privacy.

Light-dimming energy blind
The light-dimming, double-pleated blind with aluminium coating between the cloth layers improves insulation and increases indoor comfort. Please note that the solar blind is suitable for flat roof windows with a clear dome only.

- Blackout effect.
- Protects against cold from the outside.
- Enables privacy.

Awning blind
Installed between the window and the dome, transparent awning blinds are solar powered and operated by remote control. They keep the indoor temperature comfortable by filtering the strong rays of the sun and easy to install.

- Provides up to 77% effective heat protection.
- Dims daylight and prevents direct glare.
- Increases privacy.

MSG – Solar awning
MSG awning blind is not compatible with a VELUX flat glass rooflight.

Order your VELUX blinds and shutters online at veluxblindsdirect.co.uk

Check your data plate to find the type and size of your roof window model.

All flat roof blinds have delivery times of up to 7 days.

Delivery time is in working days from receipt of orders placed before 4pm (UK) and 11.30am (NI).
VELUX insect screens let you enjoy fresh air – without any unwanted visitors. They are simple to operate, and they fit any VELUX roof window. Insect screens stow neatly away in the slim aluminium top casing when not in use.

- 100% insect-proof net fabric.
- Durable, transparent fabric – does not obstruct your view.
- Improved visibility – lets you enjoy more daylight.
- Mesh ensures perfect airflow.

Please note: Insect screens are mounted on the wall and not the window frame. You therefore need to measure your window opening to get the insect screen in the correct size.
