

Product information

VELUX INTEGRA®

centre-pivot roof window GGL

Product description

- Simple, convenient wall switch
- Pre-installed hidden window operator
- Rain sensor ensures that the window closes automatically in case of rain
- Easy installation of mains powered decoration and sunscreening products
- Wall switches use secure radio frequency (RF) technology to operate individual or groups of roof windows, blinds, awnings and roller shutters from anywhere in the building
- Ventilation flap allows fresh air to circulate even when your window is closed
- Integrated dust and insect filter

Roof pitch

- Can be installed in roof pitches between 15° and 90°

Materials

- High quality natural pinewood coated with impregnation and layers of water-based acrylic white paint or clear lacquer
- VELUX ThermoTechnology™ insulation ensures an excellent energy performance
- Maintenance-free exterior covers in lacquered aluminium, copper or zinc

Certifications

The VELUX product factories guarantee quality systems implementation process and environmental management systems through appropriate accreditations ISO 9001 and ISO 14001

EUTR In compliance with the EU Timber Regulation (EUTR), EU regulation 995/2010

REACH We are aware of the REACH regulation and acknowledge the obligations. No products are obliged to be registered in accordance to REACH and none of our products contains any Substances of Very High Concern.

Technical values

	--70	--60	--66	--62
U_w [W/m²K]	1.3	1.3	1.0	0.96
U_g [W/m²K]	1.0	1.0	0.5	0.5
R_w [dB]	35	37	37	42
g []	0.46	0.30	0.52	0.52
τ_v []	0.68	0.62	0.71	0.73
τ_{UV} []	0.05	0.05	0.05	0.05
Air permeability [class]	4	4	4	4

Thermal improvements such as lower U-value (U_w) and lower linear heat loss coefficient (φ) can, for some variants, be obtained with frame insulation collar and/or recessed installation.

Glazing structure

	--70	--60	--66	--62
Inner glass pane	2 x 3 mm laminated float with low ε coating	2 x 3 mm laminated float with low ε coating	2 x 3 mm laminated float with low ε coating	2 x 3 mm laminated float with low ε coating
Middle glass pane		-	3 mm heat strengthened float with low ε coating	3 mm heat strengthened float with low ε coating
Outer glass pane	4 mm toughened	6 mm toughened with coatings	4 mm toughened with coatings	8 mm toughened with coating
Cavity	15 mm	15 mm	2 x 12 mm	2 x 10 mm
Glass panes	Double	Double	Triple	Triple
Gas filling	Argon	Argon	Krypton	Krypton

Glazing features

		--70	--60	--66	--62
	Heat insulation Low energy glazing provides reduced heat loss through the window and enhanced indoor comfort.	•	••	•••	•••
	Solar gain In the wintertime, the heat from the sun entering through the windows is a usable solar gain.	•••	•	••	••
	Solar protection In warm climates and in rooms with large window areas, a sun protective coating provides a better indoor climate during summer periods. Alternatively, exterior sun screening can be installed.		•••		
	Sound insulation A combination of laminated glass and optimal glass thickness provides better sound insulation. Frame/sash construction and gaskets are equally important.	••	•••	•••	•••
	Security Thicker laminated inner glass pane designed to increase resistance to manual attack (burglary).	•	•	•	•
	Energy balance The energy balance represents the ability of the roof window to utilise the passive solar gain and keep in the heat during winter and its ability to protect against the risk of overheating during summer. Sun screening products can further improve indoor summer comfort.	✓	✓	✓	✓
	Safety Laminated inner glass is designed to hold the fragments together if the glass breaks. We recommend that you consider using glass units with laminated glass on the inside for windows placed above areas where people sleep, play or work.	✓	✓	✓	✓
	Outside strength Toughened outer glass pane makes your glazing more resistant to hail, heavy wind and snow loads.	✓	✓	✓	✓
	Delayed fading of materials Inner laminated glass protects materials behind the glass against the UV radiation and therefore delays fading of the materials.	✓	✓	✓	✓
	Rain noise reduction The combination of laminated glass and extra thick glass helps provide a significant, audible reduction of rainfall sound. Frame/sash construction and gaskets are equally important.		✓	✓	✓
	Easy-to-clean The easy-to-clean coating minimises the cleaning frequency of the outer glass pane and gives you a clearer view in case of rain.		✓	✓	
	Anti-dew The anti-dew coating significantly reduces the days with dew on the outer glass pane and thus gives you a clear view.			✓	✓

• Good •• Better ••• Best ✓ Feature included in glazing variant

Technical values, ventilation through ventilation flap

Property	Windows with double or triple glazing					
	Width					
	CK--	FK--	MK--	PK--	SK--	UK--
Air flow characteristics [l/s]	1.9	2.3	2.8	3.4	4.1	4.8
Air flow exponent [-]	0.53	0.53	0.53	0.53	0.53	0.53
Ventilation capacity at 4 Pa [l/s]	4.0	4.8	5.8	7.1	8.5	10.0
Ventilation capacity at 8 Pa [l/s]	5.7	6.9	8.4	10.2	12.3	14.5
Ventilation capacity at 10 Pa [l/s]	6.4	7.8	9.5	11.5	13.9	16.3
Ventilation capacity at 20 Pa [l/s]	9.3	11.3	13.7	16.6	20.1	23.5
Equivalent area through ventilation flap [mm ²]	2600	3100	3700	4600	5600	6600
Geometrical free area [mm ²]	2000	3100	3600	5800	9100	12500

Please note that glazing type 62 has negligible ventilation through the ventilation flap due to the construction of the window.

Visible features

1 Window opening

When operated with the control pad, the window opens variably up to 200 mm. The window can also be opened manually, eg in case of power failure

2 Data plate

Each VELUX roof window has a unique data plate showing type, size, variant etc of the window. QR code with link to local mobile website

3 Lock casing

Electro-galvanised steel

4 Ventilation flap with control bar

The ventilation flap is designed with a control bar to allow for manual operation

5 Excellent insulation

Elements of expanded polystyrene ensure an excellent energy performance

6 Barrel bolt

The roof window can be rotated and secured in position with a barrel bolt to ensure safe and easy cleaning of the outside pane from the inside

7 Brackets for accessories

With the pre-installed VELUX Pick&Click!™ brackets, installation of solar powered blinds could not be easier

8 Wall switch

VELUX INTEGRA® wall switch for simple, convenient operation of the window.

Visible features

1 Rain sensor

The rain sensor ensures that the window closes automatically if it starts raining

2 Click-on covers

Click-on covers make installation easier, faster and safer

3 Window operator and chain

Fully integrated, hidden motor with chain. Silent motor operation

4 Laminated pane

Laminated inner glass on all variants for personal safety

5 Pivot hinge

VELUX high quality pivot hinge provides stability and perfect sash balance. Electro-galvanised steel

Cleaning and maintenance

To clean the outer pane from the inside, rotate sash and secure in cleaning position with barrel bolt.

VELUX repair and maintenance kits are available.

Exterior covers

Material	NCS standard colour	RAL nearest standard colour
Lacquered aluminium (-0--) grey	S 7500-N	7043
Lacquered aluminium (-5--) black	S 9000-N	9005
Copper (-1--)	-	-
Titanium zinc (-3--)	-	-

Special colour requests, please contact velux.co.uk

Interior finish

White paint	Impregnation and layers of water-based acrylic lacquer and paint, NCS standard colour: S 0500-N, nearest RAL standard colour: 9003.
Clear lacquer	Impregnation and layers of water-based acrylic lacquer

Special colour requests, please contact velux.co.uk

Flashings and installation products

Flashings:

- ED- for single installation
- EB- for twin installation
- EK- for combi installation

Available for standard and recessed installation

Installation products:

- Installation set BDX 2000 (incl. BFX)
- Underfelt collar BFX 1000 incl. transverse drainage gutter
- Vapour barrier collar BBX 0000
- Linings LS- (incl. BBX)

Blinds, awnings and shutters

Interior suncreening

- Blackout blind
- Roller blind
- Pleated blind
- Flying pleated blind
- Double pleated energy blind
- Venetian blind
- Duo blackout blind

Exterior suncreening

- Awning blind
- Roller shutter

Additional accessories

- Insect roller screen

- Available in manual and mains/solar powered versions
- Available in manual and mains powered versions
- Available in manual version
- ★ Available in mains powered version

The mains and solar powered versions are part of the VELUX INTEGRA® product range.

Control options

Upgrade your system

VELUX INTEGRA® Active sensor system monitors and receives data from the outside solar and temperature sensors and activates blinds and shutters when necessary. In this way, the system improves thermal comfort while also reducing cooling costs in summer and heating costs in winter.

Technical information

Material and colour	<p>Roof window: See brochure or price list for variants.</p> <p>Wall Switch: ABS, white (NCS S 1000-N).</p> <p>Window operator: PBT with glass fibre, black (NCS S 9000-N) and stainless steel chain.</p> <p>Rain sensor: Gold-coated sensor, grey (RAL 7022)</p>
Size and weight	<p>Size of product including packaging: The same as equivalent manually operated roof window.</p> <p>Weight: Approx 3 kg more than equivalent manually operated roof window.</p> <p>Wall switch: 82 x 82 x 17 mm (W x H x D), 114 g (with batteries 125 g).</p>
Installation and use	<p>The window is classified in protection class IP44.</p> <p>The window operator hidden in the top cover and functions at temperatures between -10°C and +60°C.</p> <p>The wall switch is for indoor use, maximum ambient temperature 45°C.</p> <p>Radio frequency range: 300 m free field. Depending on building construction, the indoor range is approximately 30 m.</p> <p>Installation in rooms with a high level of humidity must comply with relevant regulations (contact a qualified electrician if necessary).</p>
Window opening	<p>Max 200 mm within 35 seconds.</p> <p>Due to a shorter chain, small/special window sizes have a different window opening.</p> <p>Window opening for sizes --01 and --02 = 135 mm. Window opening for sizes --25 and --27 = 38 mm.</p>
Power consumption	<p>230/240 V a.c. – 50 Hz / 40 VA</p> <p>Wall switch: 2 x alkaline AAA (1.5 V) batteries. Expected battery lifetime: Approximately 2 years.</p>
Motor capacity	<p>Traction capacity: Min 225 N</p> <p>Pressure capacity: Min 150 N</p>
Connection	<p>The window is equipped with a 7.5 m 2-core cable (H05VV-F) with a standard mains plug for connection to the mains supply (2.5 m for the UK).</p>
Compatibility	<p>The window is based on radio frequency (RF) technology, 868 MHz range, and is compatible with other products with the io-homecontrol® logo.</p> <p>The window is prepared for subsequent installation of mains powered VELUX INTEGRA® interior and exterior decoration and sunscreening products as well as frame lights.</p> <p>It is not compatible with battery powered or VELUX INTEGRA® Solar decoration and suncreening products.</p> <p>Connection to non-compatible products may cause damage or malfunction.</p>
CE marking	<p>The window is CE-marked to indicate that it is in accordance with the EU directives CPD, LVD, MD, R&TTE and EMC for household, trade and light industry.</p>
Note	<p>This sheet describes the added features of mains powered VELUX INTEGRA® roof window GGL compared with manually operated VELUX roof window GGL. For further information on the features and specifications of GGL, please see the main VELUX brochure.</p> <p>We reserve the right to make technical changes.</p>
