At VELUX® we know how important it is to start planning for daylight in a project as early as possible.

For decades we have led the way in designing innovative roof windows, blinds, shutters and accessories, all of which help create bright and welcoming spaces.

VELUX roof windows can bring twice the amount of daylight* into your extension than vertical glazing of the same size, or transform your loft into a brand new space.

You can also enjoy optimum comfort in your home thanks to VELUX ACTIVE, our smart home solution that works with VELUX INTEGRA® electric and solar powered products to automatically control the light, ventilation and indoor climate of your home.

In keeping with our commitment to developing exciting new products, this year we are launching the VELUX INTEGRA® electric top-hung roof window. With all the benefits of the manual top-hung roof window, this product now comes in an electric option that can be paired with VELUX ACTIVE.

Explore our full range of sizes, options and finishes – all backed by the expertise and support of our technical team, and bring some truly innovative ideas to your next project.

Size guide 74
### Getting daylight right

#### The ideal amount of natural light

Natural light is essential to your wellbeing. The size as well as the number of windows are fundamental to how your space will look and feel. Combining VELUX roof windows with vertical glazing is essential as it allows daylight to enter your home from different angles. For optimal comfort, we recommend that the glazed areas represent 15-20% of the overall floor area in your room.

**A SIMPLE CALCULATION**

Here are some examples:

<table>
<thead>
<tr>
<th>Floor space under the roof</th>
<th>Recommended glazed area</th>
<th>Distribution of the glazed area</th>
<th>Number and size of roof windows</th>
</tr>
</thead>
<tbody>
<tr>
<td>10 m²</td>
<td>x 15% = 1.5 m²</td>
<td>2 X PK08 roof windows or 3 X MK06 roof windows</td>
<td></td>
</tr>
<tr>
<td>15 m²</td>
<td>x 15% = 2.25 m²</td>
<td>2 X UK08 roof windows or 3 X PK08 roof windows</td>
<td></td>
</tr>
<tr>
<td>25 m²</td>
<td>x 15% = 3.75 m²</td>
<td>3 X UK08 roof windows or 4 X PK10 roof windows</td>
<td></td>
</tr>
</tbody>
</table>

**Recommended glazed area**

### Dimensions of pitched VELUX roof windows

This grid highlights the glazed area measurements that each of our standard VELUX roof window sizes will provide.

#### Dimensions of pitched VELUX roof windows

<table>
<thead>
<tr>
<th>VELUX roof window type</th>
<th>Glazed area in m²</th>
</tr>
</thead>
<tbody>
<tr>
<td>SK08</td>
<td>0.47</td>
</tr>
<tr>
<td>PK06</td>
<td>0.91</td>
</tr>
<tr>
<td>MK04</td>
<td>0.59</td>
</tr>
<tr>
<td>UK06</td>
<td>0.72</td>
</tr>
<tr>
<td>GT07</td>
<td>0.92</td>
</tr>
<tr>
<td>UK08</td>
<td>1.07</td>

**Design inspiration Your ideal solution**

You can never have too much daylight in your home. It will always make the space lighter and brighter.

Using our recommended calculation, the below images highlight the percentage of daylight achieved in each scenario and the effect multiple roof windows can have in a room.

**Download the VELUX MyDaylight App**

to your phone and visualise how your own loft space could look with added daylight through the roof.

**Other measurements available on request.**

VELUX roof windows
Our product features at a glance

Our highly engineered roof windows have the latest technology built in. Our research and development teams are continuously refining products to improve performance.

The following features come as standard with all of our roof windows and are designed to make installation and operation easier, as well as ensuring our products look their best.

Safety glazing prevents glass from falling into your home if broken, and is standard in all of our roof windows (excluding rooflights for uninhabited spaces). Glazing options include noise reduction, privacy and added insulation.

VELUX ThermoTechnology™ features high performance materials in the roof window construction. This ensures you use less energy whilst keeping the warmth in your home.

Our high-quality pivot hinges are designed with innovative technology, ensuring stability throughout the life of your product.

Safety glazing prevents glass from falling into your home if broken, and is standard in all of our roof windows. Glazing options include noise reduction, privacy and added insulation.

For easy cleaning of the outside pane, the barrel bolt locks the roof window in a 180° position. Now both hands are free for you to clean the outer pane easily and safely from within the room.

Our high-quality pivot hinges are designed with innovative technology, ensuring stability throughout the life of your product.

For easy cleaning of the outside pane, the barrel bolt locks the roof window in a 180° position. Now both hands are free for you to clean the outer pane easily and safely from within the room.

The same bracket is used for both recessed and standard installations. A simple red and blue line system shows where the bracket should be installed. You can be confident of a straightforward installation every time.

Click-on covers make your installation easier, faster and safer, by reducing the number of screws required onsite.

Our pre-installed, patented mounting brackets come as standard on every new VELUX roof window and fit any of our VELUX blinds, making installation as straightforward as possible.

The unique brushed aluminium ventilation bar makes it possible to let fresh air into your home, even when the roof window is securely closed or when you are away or sleeping, without having to worry about security or bad weather.

Click-on covers make your installation easier, faster and safer, by reducing the number of screws required onsite.

Our pre-installed, patented mounting brackets come as standard on every new VELUX roof window and fit any of our VELUX blinds, making installation as straightforward as possible.

The finishing touch to suit your home

THREE INTERNAL FINISH OPTIONS

Lighter, brighter modern living spaces are more popular than ever. To ensure you have the means to make the most of your project, we offer three internal finish options. All finishes have the same high VELUX quality combined with:

• laminated safety glass as standard
• straightforward installation
• excellent value for money
• short delivery time.

WHITE POLYURETHANE FINISH

• Wooden cores encased in moisture-resistant white polyurethane. The first choice for humid rooms such as kitchens and bathrooms.
• No visible joints, so dirt can’t accumulate in the corners.
• Maintenance-free, which is ideal for out-of-reach areas.
• Thermally moulded timber core delivers improved insulation.

WHITE PAINTED FINISH

• Painted before assembly for a flawless finish and outstanding durability.
• Bright white finish with discreet wood grain matches perfectly with modern interiors.
• Lower maintenance than pine finish roof windows.
• Highly UV resistant, water-based breathable paint to preserve a crisp, bright look.

PINE FINISH

• Matches perfectly with traditional interiors.
• Protective triple coat clear lacquer helps to preserve the timber of the window.

VELUX INTEGRA® electric roof windows transformed this room into a stunning and bright living space. Without roof windows, this room lacked direct sunlight because light from vertical patio doors have a limited reach. After VELUX roof windows were planned into this project, they brought in twice as much daylight as vertical glazing of the same size – now it’s a welcoming kitchen with room to cook, entertain and spend time with family.

Featured VELUX roof windows: GGU PK10 007021U

VELUX product range

DARK NIGHT SOLUTIONS
To get the optimum daylight design, consider the size and function and where daylight will be needed.

VELUX RECOMMEND
VELUX INTEGRA® Electric roof windows give you control at the touch of a button, meaning getting rid of humidity from cooking is easy.

Find out more on p22

WHITE POLYURETHANE
Moisture-resistant and maintenance-free, perfect for humid kitchens.

LAMINATED GLAZING
Safety glazing will prevent glass falling into your home in case of breakage.

PLEATED BLIND
You can control the amount of daylight and the temperature within a room by adding a VELUX blind. Available in both electric or solar powered options, a pleated blind is ideal for any contemporary kitchen.

Choose the perfect kitchen product bundle for your home. See p34 for more details.

VELUX INTEGRA® electric centre-pivot white polyurethane roof window

Suitable flashing kit for your roofing material

VELUX INTEGRA® electric pleated blind

Design inspiration
This dining room would have been quite gloomy without VELUX roof windows. The roof windows are out-of-reach, but as they are VELUX INTEGRA® roof windows, you have daylight and fresh air at your fingertips as it can be easily opened or closed at the touch of a button.

Your extended living space – Adding the right amount of natural daylight

To maximise daylight, consider the balance between vertical glazing and roof windows carefully.

VELUX RECOMMEND

VELUX INTEGRA®
Electric roof windows give you control at the touch of a button, perfect for out-of-reach areas. Find out more on p22 ➔

WHITE PAINTED
Bright white finish with discreet wood grain and has lower maintenance than pine roof windows.

LAMINATED GLAZING
Safety glazing will prevent glass falling into your home in case of breakage.

PLEATED BLIND
You can control the amount of daylight and the temperature within a room by adding a VELUX blind. A VELUX pleated blind is a great solution for practical living spaces.

Choose the perfect living/dining room product bundle for your home. Turn to p35 for further details.

VELUX INTEGRA®, electric centre-pivot white painted roof window
VELUX INTEGRA®, electric pleated blind
Suitable flashing kit for your roofing material

Your extended living space – Adding the right amount of natural daylight

This dining room would have been quite gloomy without VELUX roof windows. The roof windows are out-of-reach, but as they are VELUX INTEGRA® roof windows, you have daylight and fresh air at your fingertips as it can be easily opened or closed at the touch of a button.

VELUX roof windows

DAYLIGHT SOLUTIONS

Bifold doors will bring daylight in from one particular angle.

Combine bifold doors with 2 or more roof windows and you can fill the space with twice the amount of daylight.

Suitable flashing kit for your roofing material

VELUX INTEGRA®, electric centre-pivot white painted roof window
VELUX INTEGRA®, electric pleated blind
This bedroom was created by transforming an unused loft space. Installing both sloping and fixed VELUX roof windows not only adds a real wow factor, but it dramatically increases the level of daylight flooding into the room. As well as a means of escape during an emergency, these top-hung roof windows allow for stunning, uninterrupted views.

Featured VELUX roof windows: GPL PK08 2060 combined with a GIL PK34 2060 with DKL PK08 0705 & DKL PK04 0705 blackout blinds

Your bedroom – A bright and airy space

Download the VELUX MyDaylight App to your phone and visualise how your own loft space could look with added daylight through the roof.

DAYLIGHT SOLUTIONS
Ensure you consider the number of roof windows to maximize the potential of your loft.

A single roof window will bring in some daylight, but not the optimal amount.

With 2 or more roof windows, you can brighten the whole room with more daylight.

VELUX RECOMMEND

TOP-HUNG
Enjoy panoramic, uninterrupted views.
Find out more on p20 ➔

WHITE PAINTED
Matches perfectly with modern interiors.

NOISE REDUCTION GLAZING
Noise reduction glazing is perfect for a good night’s sleep.

DUO BLACKOUT BIND
A blackout blind and pleated blind in one. It offers the best of both worlds; blackout at any time and softly diffused natural light all day.

Choose the perfect bedroom product bundle for your home. Turn to p33 for further details.
Replacement roof windows – It’s easier than you think

Breathe new life into your space by replacing your old VELUX roof windows. Our white painted roof windows are specially designed to suit modern interiors. The same standard VELUX sizes are available, and can usually be fitted quickly and easily from inside the room, without disrupting the current internal finish.

Featured VELUX roof window on right: GGL MK08 2060

ISSUE
Do your old pine roof windows no longer match your modern interior?

SOLUTION
Replacing pine roof windows with white painted ones will offer a much brighter and contemporary feel to your space.

Are your roof windows in an out-of-reach location?

SOLUTION
Installing VELUX INTEGRA® solar powered or electric roof windows means you can open or close your roof windows at the touch of a button.

Does replacing your roof windows sound time consuming?

SOLUTION
Choosing the VELUX roof window that’s right for you is hassle-free, and can often be installed in 4 hours.

For more inspiration...
To find the best replacement roof window for you, visit velux.co.uk/replacement and use our replacement configurator.

VELUX product range

VELUX BLINDS
Our collection of blinds feature an extensive range of designs and finishes, and our Pick&Click!™ system means they can be fitted in minutes.

VELUX INTEGRA® electric and solar powered centre-pivot roof windows

The ideal solution for out-of-reach areas

Featured VELUX roof windows: GGU PK10 007021U

Operation

• Operate your roof windows with a convenient wall switch.
• Fully integrated motor which runs almost without a sound.

Solar Powered

• All the same features as VELUX INTEGRA® electric roof windows, but powered by the sun.
• PV solar cell on external window frame requires exposure to sunlight.

Benefits

• Ideal for out-of-reach areas.
• VELUX INTEGRA® roof windows offer control at your fingertips and provide fresh air, better indoor comfort and home security.
• Rain sensors feature on all VELUX INTEGRA® roof windows, automatically closing in the event of rain.
• Works together with VELUX ACTIVE for a smarter way to achieve a healthier indoor climate.

Price

• All roof windows have a delivery time of 2 days except ‘66’ pane windows and GGL 206030 which are 11 days.
• Delivery time is in working days from receipt of orders placed before 4pm (UK) and 11.30am (NI).

Anti-dew coating reduces number of hours external condensation is present.

Roof pitch

15° - 90°
Suitable for roof pitches between 15° and 90°.

ELECTRIC

• Operate your roof windows with a convenient wall switch.
• Fully integrated motor which runs almost without a sound.

SOLAR POWERED

• All the same features as VELUX INTEGRA® electric roof windows, but powered by the sun.
• PV solar cell on external window frame requires exposure to sunlight.
VELUX INTEGRA® electric top-hung roof windows

Add more wow factor to your home

Featured VELUX roof windows: GPU SK06 006621U combined with GIU SK34 0066

Our VELUX INTEGRA® electric top-hung roof windows effortlessly transform your space, filling it with daylight. Easy to use, these roof windows offer total control at the touch of a button. VELUX INTEGRA® electric top-hung roof windows are the ultimate choice for fresh air and better indoor comfort.

SPECTACULAR VIEWS

Full 45° opening allows for stunning views in all situations and creates a balcony-like feeling that fills your space with natural daylight.

TWO OPERATIONS IN ONE

Enjoy the benefits of two opening options thanks to hybrid functionality, with unobstructed panoramic views and centre-pivot operation for easy cleaning.

VELUX INTEGRA®

Easily open and close your roof window at the touch of a button with a convenient wall switch. To keep your home dry, our VELUX INTEGRA® roof windows also automatically close in the event of rain.

SMART OPERATION

For a healthier indoor environment, add VELUX ACTIVE with NETATMO for smart sensor-based operation and app-control. Find out more on p26.

VELUX ACTIVE

VELUX ACTIVE works together with your VELUX INTEGRA® electric or solar powered roof windows, blinds and shutters, adjusting them automatically so your family enjoys a healthier indoor climate.

Sensor-based ventilation
Smart sensors monitor temperature, humidity and CO₂ levels, allowing VELUX ACTIVE to intuitively open and close your VELUX INTEGRA® products.

Safe and secure
Tap the departure switch on your way out of the house to close your VELUX INTEGRA® products. This will leave them in the secured ventilation position – for security and peace of mind.

Control from your smartphone
The VELUX ACTIVE app means you can operate your VELUX INTEGRA® products yourself from anywhere in the world, putting you in complete control.

Voice activation option
Apple HomeKit® compatibility lets you use voice control to operate your VELUX INTEGRA® products for complete convenience.

Easy installation
Designed to be installed quickly and easily by homeowners – if you already have VELUX INTEGRA® products, the VELUX ACTIVE kit comes with everything you need to install the system yourself.

The kit includes:
- VELUX ACTIVE indoor climate sensor
- VELUX ACTIVE departure switch
- VELUX ACTIVE gateway

Interprets the information from the indoor climate sensors and instructs the VELUX INTEGRA® products to open or close.

Additional components:
- VELUX ACTIVE indoor climate sensor KLA 300 EU £73.33
- VELUX ACTIVE departure switch KLN 300 EU £35.83

VELUX conservation roof windows

For traditional buildings

When planning dictates that a window of traditional external appearance is required, conservation roof windows should be considered. All of our conservation roof windows have the same technical features as a VELUX roof window but in a traditional black conservation style.

- Available in either centre-pivot or top-hung.
- Black external profiles and glazing bar.
- Recessed installation for slate and tiled roofs.
- Top-hung roof windows listed below are suitable for emergency escapes.
- Other sizes and glazing options available – contact us for further information.

What does a conservation package include?

- Roof window with pre-fitted glazing bar with laminated glazing as standard for safety.
- Recessed flashings available for a more streamlined external appearance.
- Insulation collar and underfelt collar provided for a weather-tight and energy efficient installation.

Conservation roof windows

| External frame size (nominal w x h) cm | 55 x 78 | 55 x 98 | 55 x 118 | 66 x 118 | 78 x 98 | 78 x 118 | 78 x 140 | 94 x 118 | 94 x 140 | 134 x 98 | 134 x 118 | 134 x 140 |

- All roof windows have a delivery time of 2 days.
- Delivery time is in working days from receipt of orders placed before 4pm (UK) and 11.30am (NI).

Optional glazing bars for standard VELUX roof windows

- Grey glazing bars are available for standard VELUX roof windows.

To create your grey conservation package

1. Select your preferred VELUX roof window. This includes white painted, white polyurethane, pine and all operating methods. P58–29
2. Choose a flashing kit right for your roof pitch and roofing material – see our recessed flashing kit. P58–57
3. Use VELUX installation products for optimum energy efficiency. P56–57
4. Add one or more conservation glazing bars of the right size to your roof windows. Remember, to match grey exteriors you should consider adding a grey glazing bar (nearest RAL 7043).

Grey glazing bars are also available for standard VELUX roof windows.
Achieving a hassle-free project means choosing the right materials and fittings. It’s important to specify everything you need at the outset to get it right first time. If you have read through our daylight solution guide on p4-5, you will have an idea of the size and quantity of roof windows you require for your space.

To make life easier, we’ve selected the optimal products for key projects, shown here as VELUX product bundles. You can order everything you need to optimise your installation with one single code, ensuring you choose the products that work best for the size and function of your room.

单层天窗窗束用于阁楼改造

Light is a big consideration in bedrooms. On the one hand you want a bright and airy room, but most people like a darker room for a good night’s sleep, so this bundle combines a black-out blind with your choice of one roof window.

1. FLASHING – Marries the roof window to the roofing material.
2. INSTALLATION PRODUCTS – Ensures a well-insulated and weather-tight installation.
3. TOP-HUNG WHITE PAINTED ROOF WINDOW – Ideal for when the roof window is set higher in the roof pitch or above furniture.

VELUX CABRIO® balcony
Transforms from a roof window into a balcony in seconds

Featured VELUX roof windows: GDL SK19 SKOW224

VELUX CABRIO® balcony
The VELUX CABRIO® balcony transforms from a roof window into a balcony in seconds and adds real wow-factor to your property:

- Top-hung upper section opens out whilst bottom section unfolds into a glazed balcony with side railings.
- Easily combined with additional top-hung and fixed sloping roof windows for more daylight.
- Triple glazing featured as standard, contributing to an energy efficient installation.
- The glazing has a toughened outer and laminated inner pane for additional safety.

VELUX sloping and fixed combinations

Give your home its own unique character

Featured VELUX roof windows: GGL PK08 2070 combined with GIL PK34 2070

Sloping and fixed combinations

Multiple VELUX roof windows create gorgeous, light-filled rooms. By combining VELUX roof windows, you can create panoramic views and bring in twice the daylight. If the pitch of your roof continues to the floor, you can extend your VELUX roof window by installing an additional window element, GIU (white polyurethane) or GIL (white painted) below. These bottom elements have a fixed sash that cannot be opened.

Finding the right window

Follow the steps below to find the best solution for your room:

1. Decide on your combination.

2. Select your opening roof window(s) in sizes MK04, MK06, MK08, PK08 and PK10 (priced separately).
   - Choose from:
     • Centre-pivot – p18
     • VELUX INTEGRA® – p22
     • Top-hung – p20.

3. Select your bottom fixed element(s) – sizes MK34 or PK34 (other sizes available)*

4. Select the appropriate flashing system for your roof window size and roofing material.

* Other combinations can be created, contact us for further information.

VELUX sloping and vertical combinations

Expand the possibilities for views and daylight

Featured VELUX roof windows: GPL PK08 2070 combined with VFE PK38 2070

Finding the right window

Follow the steps to find the best solution for your room:

1. Decide on your combination – single, twin or triple.

2. Select your white polyurethane or white painted roof windows in size MK04, MK06 or MK08 (priced separately).
   
   Choose from:
   • Centre-pivot – p18
   • VELUX INTEGRA® – p22
   • Top-hung – p20.

3. Select your bottom vertical element(s) – size MK31 or MK35 (other sizes available)* The white painted vertical element is available as either side-hung or bottom-hung, and opens inwards for added ventilation and cleaning. The white polyurethane element is fixed.

4. Select the appropriate flashing system for your roof window size, combination and roofing material. If selecting twin or triple combinations, we recommend the use of an EBY trimmer for added support and a harmonious internal finish.

* Other combinations can be created, contact us for further information.

VELUX curved glass rooflight

The stylish solution
The VELUX curved glass rooflight is the ideal choice for homeowners with 0-15° roof pitches:

- Elegant solution for externally visible installations.
- Glass-to-edge construction allows for a clear, uninterrupted view.
- Low maintenance due to curved glass allowing rain to run off.
- 3-layer glass construction ensures optimal energy performance.
- Scratch-free glass prolongs the unit’s expected lifetime.
- Hassle-free installation in 0-15° roof pitch.

For pricing see p45

VELUX flat roof windows
Performance from every angle

Featured VELUX roof window: CVP 100150 0673QV combined with an ISD 100150 1093
VELUX flat glass rooflight

VELUX flat glass rooflights are a stylish addition to our flat roof window range featuring an attractive eye-catching glass pane.

Convenience and high performance
As well as an innovative design, the flat glass rooflight features all of the outstanding specifications you’d expect from VELUX.
• It comprises a maintenance-free PVC framework and lacquered aluminium cladding.
• Highly energy efficient, our high-performance insulation is integrated into the frame to give the best possible protection against heat loss.

Fixed rooflight
The VELUX fixed flat glass rooflight can transform any space and is ideal where there is a need for bringing in daylight without ventilation. The double-glazed unit has a laminated inner pane for additional safety.

Electrically operated rooflight
The VELUX vented flat glass rooflight provides ventilation and fresh air through the roof and it can be operated automatically with the VELUX INTEGRA® wall switch.

CURVED GLASS (ISD 1093)
• Curved glazing and glass-to-edge design ensures uninterrupted drainage.
• Curved shape ensures a cleaner view to the sky.
• Up to lemma scratch-free glazing.
• Installation in a 0.15° roof pitch.
• Recommended option for visible installations.

FLAT GLASS (ISD 2093)
• Flat glass design fits the roof line.
• 4mm scratch-free glazing.
• Installation in a 2.15° roof pitch.

2. NOW CHOOSE A BASE UNIT

U-VALUES
Combining a curved glass top cover with either an electrically operated base or a fixed base unit will give you a Urc of 0.72, ref 300.
Combining a flat glass top cover with either an electrically operated base or a fixed base unit will give you a Urc of 0.79, ref 300.

Fixed

CAUTION: Special consideration for applications below roof pitch 5°.
If installed below 5°, there is an increased risk of water, dirt and debris standing on the glass, which in some cases, can cause slight discoloration of the glass over time. Installation of flat glass below 5° does not affect the lifetime and quality of the product compared to installation at 5°.

Fixed rooflight

The VELUX fixed flat glass rooflight can transform any space and is ideal where there is a need for bringing in daylight without ventilation. The double-glazed unit has a laminated inner pane for additional safety.

Electrically operated rooflight

The VELUX vented flat glass rooflight provides ventilation and fresh air through the roof and it can be operated automatically with the VELUX INTEGRA® wall switch.

Accessories
Extension kerb 150mm (for warm roof installations only).
Frame fixing kit for roof material.

Special consideration for applications below roof pitch 5°.
If installed below 5°, there is an increased risk of water, dirt and debris standing on the glass, which in some cases, can cause slight discoloration of the glass over time. Installation of flat glass below 5° does not affect the lifetime and quality of the product compared to installation at 5°.

**VELUX flat roof kerb**

All the benefits of a VELUX roof window in a flat roof

- Insulated timber kerb to allow the installation of a standard VELUX roof window into a flat roof
- Select the insulated timber kerb to match the size of your roof window
- Allows you the flexibility to select the most appropriate type of roof window for your application such as white polyurethane finish or VELUX INTEGRA®
- Roofing material is dressed up the sides of the kerb, then overlapped with the aluminium cover parts.
- Refer to p18-25 for info on roof windows.
- Roof window not included.

**Flat roof kerb**

| External frame size (nominal w x h) cm | Code | Description | Price
|--------------------------------------|------|-------------|-------
| 51 x 72                              | 090120 | Insulated timber kerb for installation of VELUX flat roof window into flat roof kerb only | £262 £268 £301 £336 £395 £437 £477

**Delivery time**

- Delivery time is in working days from receipt of orders placed before 4pm (UK) and 11.30am (NI).
- All roof windows have a delivery time of 2 days.
VELUX Modular Skylights
Open up your home to more natural light

Featured VELUX roof windows: VELUX Modular Skylights (5 x longlight modules, comprising 3 x fixed and 2 x vented).

Why VELUX Modular Skylights?
VELUX Modular Skylights are specially designed to bring more natural light into modern, flat roof homes and extensions. Modularity allows you to design with daylight over larger roof expanses, with an end result that blends more with the surroundings.

Unique design
VELUX Modular Skylights offer a slim profile design, which is great for modern homes that need to make the most of the daylight. Electrics and motors within vented modules are concealed, creating a simple and refined look, inside and out.

Light up the rooms in your home
The kitchen is the heart of the home, and the range of activities we enjoy there means that the lighting must meet everyone’s needs, whilst also keeping the room looking good, morning, noon and night.

VELUX Modular Skylights offer a much stronger source of illumination than limited light coming from your vertical windows.

VELUX Modular Skylights

VELUX sun tunnels

Natural daylight for windowless areas

Featured VELUX sun tunnel: TWR 0K14 2010

VELUX sun tunnels

Natural daylight where you never thought it could be achieved. Ideal for windowless bathrooms, hallways and cupboards.

Rigid sun tunnels for pitched roof
- Rigid tunnels are recommended for maximum daylight.
- Recommended tunnel length 0.9-6m.
- 1.7m tunnel supplied (ZTR extensions are available).
- Available in 10 and 14 inch.

Flexible sun tunnels for pitched roof
- Flexible sun tunnels should be used where a rigid tunnel is not suitable.
- Recommended tunnel length 1.5m.
- 2m tunnel supplied.

Flat roof sun tunnels
- Available in rigid and flexible.
- Supplied with PVC kerb and polycarbonate dome.
- Recommended tunnel length 0.2 – 0.9m.
- 0.9m tunnel supplied.

Delivery time is in working days from receipt of orders placed before 4pm (UK) and 11.30am (NI).
Smoke ventilation system

Innovative solution for a flat roof where smoke ventilation is required. Available for 0.88m² (100x100cm) or 1.30m² (120x120cm) of smoke-free ventilation area.

- Double-glazed window with protective polycarbonate cover.
- AA fire rated.
- Tested and certified to EN ISO 12101-2.
- Smoke sensors, control systems and break glass units to be purchased separately.

Available for 1m² (SK06 size) or 1.5m² (UK08 size) of smoke-free ventilation area.

- Maintenance-free, white polyurethane, centre-pivot roof window.
- For geometric smoke ventilation, our systems are tested and certified to EN ISO 12101-2 for roof pitches between 15°-90°.
- For aerodynamic smoke ventilation, our systems are tested and certified to EN ISO 12101-2 for roof pitches between 15°-60°.
- Comes with laminated inner pane for additional safety.
- Other sizes available, contact us for further information.

- Delivery time in working days from receipt of orders placed before 4pm (UK) and 11.30am (NI)

Smoke ventilation and rooflights for uninhabited spaces

Uninhabited spaces

Our rooflights are designed in such a way that you have the opportunity to bring light into uninhabited spaces. It is not advisable to use these rooflights in habitable rooms due to their thermal performance.

- Frame and integrated flashing made of maintenance-free polycarbonate.
- Operated using a handle with three ventilation positions.
- Extruded aluminium sash which can be hinged on both sides, opening to an angle of 90°.
- Opening restrictor that engages at 90° only.
- Black internal and external finish.

Replacing existing roof windows

It’s time for a change. Let in more daylight, create more comfort and increase energy efficiency.

Think bigger
Replacing a roof window, or even making it slightly bigger can bring so much more light into your space.

We’ve provided the same range of roof window sizes for the last 40 years, so it’s usually very easy to find a direct size match.

• Minimal disruption as roof windows are replaced in the existing aperture.
• Replacement installation can typically be finished in a day.
• Work can usually be carried out from the inside.

Always improving
We continuously work towards improving our products and energy efficiency.

• Improved thermal performance and sound reduction for greater comfort.
• Larger glazing areas allowing more daylight in.
• Upgrade to a white finish for VELUX INTEGRA® electric or solar remote operation.

Save time and money with VELUX replacement flashings
EL and EW single replacement flashings are essential for replacing older VELUX roof windows manufactured before April 2001 with a current roof window while maintaining the original installation level of the roof window.

This allows old roof windows to be replaced without disturbing the interior finish of the room, saving you a lot of work. If you were to use a standard flashing you would need to re-do the internal lining around the roof window.

Upgrade glazing
Advances in pane technology allow the upgrading of existing glazing units to provide better heat and sound insulation properties.

All panes are AA fire rated.

Improving the functionality of existing roof windows with automated solar operation.

Opening operation
SOLAR POWERED

• All the same features as VELUX INTEGRA® electric roof windows, but powered by the sun.
• PV solar cell on external window frame requires direct exposure to sunlight.
• No need to plug into a power supply, making installation even quicker, easier and no need for redecoration.

For a smarter, healthier home
Turn your dream of a nice, peaceful sleep into a reality, reduce traffic noise in your home and increase energy efficiency, simply with an upgrade to your glazing.

For roof windows manufactured before April 2001 contact our customer support team at 01952 778 225 to enquire.

Find out more on page 26 and watch the film at velux.co.uk/active
Installation products

Building regulations relating to insulation and air-tightness of roof window installations have become more stringent. We have not only developed a range of installation products to help make it quick and easy for you to be compliant, but the range also offers increased energy efficiency and a safe installation.

Vapour barrier – BBX
- Helps prevent condensation from forming in the roof construction.
- Complete vapour barrier collar, fully welded in all corners.
- A fully welded rubber gasket with a double pressure seal guarantees speedy installation and a vapour and air tight solution.
- Reinforced corners for extra security against perforation.
- VELUX installation tool helps fit the collar in a matter of minutes.

Insulation collar – BDX
- Insulates around the roof window frame, reducing heat loss and eliminating cold bridges.
- Makes insulating and installing the roof window a simple process.
- Supplied with BFX underfelt collar.
- Made to all standard roof window sizes.
- Click fittings ensure fast and accurate assembly.

Roof window
- The performance of your selected VELUX roof window is optimised by the use of installation products.
- All VELUX roof windows are compatible with VELUX installation products.
- Simply select your desired size, style and glazing option.

Underfelt collar – BFX
- Ensures a weather-tight seal between the roof window and the roof.
- Can also be purchased separately from the insulation collar (BDX).
- Pleated material ensures a flexible and tight seal to the underfelt of the roof, whatever its construction.
- Made from diffusion open material to minimise risk of condensation.
- Comes with transverse drainage gutter to lead water away from the head of the roof window if a tile or slate is broken above the window.
- Welded corners ensure a watertight and simple installation.

Flashing
- Marries the roof window to the roofing material and ensures a weather-tight seal.
- Standard VELUX flashings are compatible with VELUX installation products.

For use of installation products with recessed flashings, see packages on page 59.
Flashings

We provide a range of flashing options to suit your roofing material. The information below will help you to select the most appropriate flashings for your installation.

Opening sizes depend on the flashings used. Instructions available online.

EDN / EKN
- Recessed flashings for installing roof windows into slate up to 8mm thick.
- EDN 2000 includes BDX 2000F insulation package as standard.
- Not for interlocking slate.

EDJ / EKJ
- Recessed flashings for installing roof windows into flat or profiled roofing material up to 90mm in profile.
- EDJ 2000 includes BDX 2000F insulation package as standard.

EDL / EBL / EKL
- Flashings for installing roof windows into slate up to 8mm thick.
- Not for interlocking slate. See EDW for details.

EDW / EBW / EKW
- Flashings for installing roof windows into flat or profiled roofing material up to 120mm in profile.
- Also for interlocking slate, thatch and profiled sheeting.
- Our EDW flashing suits virtually every installation and supersedes EDZ as our standard tile flashing.

EDP / EBP / EKP
- Flashings for installing roof windows into plain tiles (max length 300mm).
- Maximum thickness of 14mm.

Compatibility

To find out more about the compatibility of roofing materials, flashings and different installations (such as thatch and interlocking slate tiles), please go to velux.co.uk/flashings

Recessed and standard flashings

Recessed flashings

Recessed flashings provide a sleek and streamlined finish as the roof window is installed deeper into the roof structure (see image above), meaning that less of the roof window protrudes above the roofline.

We recommend BDX insulation collar and BFX underfelt collar, included in EDN and EDJ 2000, for optimum energy efficiency.

Recessed installation height – install the brackets at the sides of the roof window frame, at the blue line level.

Standard roof window flashings

We provide a range of flashing options to suit your roofing material. The table below will help you to select the most appropriate flashings.

Standard installation height – install the brackets at the top and the bottom of the window frame, at the red line level.

Support Trimmers

- VELUX support trimmers provide structural support and also a luminous finish.
- Available in white or pine to match roof windows.
- Available in three different lengths.
- The EBY is used for frame gaps of 18mm between the roof windows and the EKY for 100mm gaps.

- Delivery time is in working days from receipt of orders placed before 4pm (UK) and 11.30am (NI).
How to select your blinds

1 Select type
Choose an interior and/or exterior VELUX blind or shutter that meets your requirements in terms of heat protection, blackout, light adjustment or insect protection.

2 Select colour and design
Our blinds are available in an extensive range of exciting colours and designs.

3 Select operation method
Choose between manual or automatic operation. Always consider electrically-operated products for out-of-reach areas.

4 Select the right size
Check the data plate which displays the type and size of your roof window – you must match the blinds you order to this information. See the chart below for more details.

5 Installed in minutes
VELUX interior blinds are easily installed with our unique Pick&Click™ system. Follow the instructions, and your blinds will be fitted in minutes.

Sizing chart
It's simple to make sure you order the right size of blind:
• Check your roof window’s data plate, then use the SIZE CODE to find its measurements on the chart below.
• Now you can check the price of your chosen blind on the following pages.
• Make sure you use the SIZE CODE on your roof window’s data plate when ordering your blind at veluxblindsdirect.co.uk

Blackout blinds

The VELUX blackout blind offers almost complete blackout for darkness anytime. Ideal for installing in bedrooms to ensure a good night’s sleep.
• Fabric offers complete blackout.
• Stepless positioning.
• Available in 24 colours.
• OEKO-TEX® certified – no harmful substances.

Upgrade from blackout to duo blackout for £22 ex VAT

Replacement blackout blinds

Suitable for VELUX roof windows manufactured before 2013, the VELUX replacement blind is the perfect, low-cost solution to change your old or tired VELUX blinds. The best choice if you want a simple blackout blind that comes with a 2-year guarantee for peace of mind.
• Essential blackout effect.
• Stepless positioning.
• Available in 4 colours.
• Only suitable for VELUX roof windows manufactured before 2013.

Blackout blinds

The VELUX duo blind is a blackout blind and a pleated blind in one. It offers the best of both worlds: blackout at any time and softly diffused natural light all day.
• Fabric offers complete blackout.
• Stepless positioning.
• Flat and pleated cloth.
• Available in 24 colours (see opposite page).
• Softly diffuses incoming daylight.
• OEKO-TEX® certified – no harmful substances.

Use the SIZE CODE to order – check the sizing chart on p.53

Blinds and Accessories
Children's collection

Disney & VELUX Goodnight Collection

The Disney & VELUX Goodnight Collection is our latest range of blackout blinds designed for kids. Inspired by their favourite characters from Frozen, Cars and Winnie the Pooh, night time has never been so much fun.

Our themed blinds will spark their imagination while they play during the day and, because the fabric offers total blackout, they'll enjoy restful sleep too.

• 99.9% blackout fabric – the best on the market!
• Installs in minutes with the unique VELUX Pick&Click™ system.
• OEKO-TEX® certified – no harmful substances.
• Slimline design integrates perfectly with VELUX roof windows.

Make bedtime full of wonder

### Venetian blinds

The VELUX Venetian blind offers complete control of the light and is the ideal solution for rooms where you want to adjust the amount and direction of incoming light. As the blinds are made of aluminium, they’re easy to wipe clean and an ideal solution for rooms with high levels of humidity, such as kitchens and bathrooms.

- **Complete light control**
  - Control the amount and direction of incoming light and shadows.
- **Award-winning design**
  - Praised for the unique tilt mechanism and cordless operation.
- **Colours**
  - Choose from 9 colour choices.

### Roller and Roman blinds

The VELUX roller blind provides basic privacy whilst still allowing natural light in. A VELUX roller blind is an effective and practical solution that offers protection and looks good. That’s why roller blinds are well suited for living rooms, home offices, playrooms, or anywhere you want basic privacy and the ability to diffuse light.

- **Privacy**
  - Provides basic privacy.
- **Harmonious light**
  - Softens the incoming light.
- **Upgrade**
  - Available in electric and solar powered operation.

Create a soft and warm atmosphere with the decorative VELUX Roman blinds. Explore the potential of beautiful fabrics and be inspired by the soft styling effects that make this collection refined and original.

- **Colours**
  - Choose from 20 elegant and decorative colours.
- **Upgrade**
  - Interchangeable fabrics.
- **Maintenance**
  - Fabric can be removed for easy cleaning.
