For over 75 years, VELUX® has led the way in designing innovative roof windows, developing an outstanding, market-leading product range that has helped to fill millions of homes with more daylight and fresh air. Which means when it comes to your next project, you can perfectly tailor your roof windows to suit your home and family’s needs.

Bringing twice the amount of daylight into your extension compared to vertical windows of the same size, VELUX roof windows are the perfect solution to creating a light, airy space for you and your family to enjoy.

In keeping with our commitment to developing exciting new products, this year we are launching VELUX ACTIVE, a new smart way to control your VELUX INTEGRA® electric and solar products.

We’re also pleased to introduce VELUX bundles, which have been designed to help you specify everything you need for your upcoming project.

Explore our full range of sizes, options and finishes – all backed by the expertise and support of our technical team, and bring some truly innovative ideas to your next project.

Bring innovation and inspiration to your next project

VELUX ACTIVE

Why choose VELUX ACTIVE?

We all know how good fresh air makes us feel when we step out of the house. So it follows that our home’s indoor climate is important too. Air quality is influenced by temperature, humidity and CO₂ levels. A healthy indoor climate can give you more energy and may mean you sleep more soundly.

With this in mind, we created VELUX ACTIVE.

Fresh air daily

The system can ventilate your house three times a day for a healthier home.

Come rain or shine

The smart sensor-based system uses external data to intuitively react to weather conditions. For instance, when hot weather is predicted, it can open your VELUX INTEGRA® electric or solar roof windows to prevent the room from overheating.

Safe and sound

On your way out? Tap the departure switch to close your VELUX INTEGRA® electric or solar roof windows for security and peace of mind.

90% of our time is spent inside, so maintaining good air quality is more important than ever.

We have partnered with revolutionary smart home company NETATMO to bring you a brand new way to control your home’s indoor climate.

Smart sensors measure temperature, CO₂ and humidity levels. The system then reacts to operate your VELUX INTEGRA® products – adjusting them automatically to provide the right level of ventilation.

VELUX ACTIVE is the smarter way to achieve a healthier indoor climate.

FIRST CLASS SERVICE
Our team is part of your team

We do more than simply supply market-leading roof windows. Our quality service matches our quality products. That’s why we believe in working in partnership with you to ensure the smoothest installation and finest end result – whether you’re fitting brand new roof windows or replacing existing ones.

The world’s Number 1 in roof windows because...

- We’ve been at the very forefront of innovative design in roof windows for over 75 years.
- Our products are tried, tested and guaranteed.
- We use cutting edge manufacturing techniques to ensure quality and consistency.
- We have a zero defect philosophy embedded into our workforce, as well as stringent final inspections, ensuring products arrive with you in perfect condition.
- VELUX products are rigorously tested in Northern Europe’s largest wind tunnel and are backed by a comprehensive guarantee.

Long-term peace of mind when you choose VELUX

Please visit velux.co.uk/registration to register your VELUX roof window guarantee.

Expert technical and aftersales service

You can always call on our expert team for technical support and specification advice. They’re here to give you in-depth assistance on planning, installation and aftercare.

Call us on: 01592 778 225

The tools to build your project

We offer you the best products on the market – we also understand the importance of helping you choose the best solution for your project. Our first class marketing materials provide inspiration and give you opportunities to enhance and expand your project.

Reliable logistics

With a vast amount of our products available in two working days, you can rely on us to deliver quickly and on time.

Dedicated field support

Our team in the UK and Ireland strive to constantly improve the service you receive. As well as advice by phone, our nationwide service technicians and field sales teams are happy to offer hands-on support throughout the year.

First class service
Bring in more daylight – make the most of your extension

**Pitched and flat roof extensions**

Many people tend to rely on glass doors such as bi-fold and patio doors to bring daylight into their extensions. However, as extension doors tend to be further away from the original room, natural daylight – even on the brightest of days – can’t penetrate very far into the house.

**Bring daylight deeper into your home**

VELUX roof windows PLUS vertical glass doors are the answer – daylight penetrates much deeper into the home, making the original space and extension so much brighter.

To maximise the light, it’s important to ensure you install the right number, type and size of roof windows – fitting multiple or larger roof windows will help you maximise the daylight in your extension.

**Create a more comfortable, airy living space**

Ventilation is key for enjoying the optimal indoor climate, creating a space that everyone loves spending time in. After all, if you want a comfortable family space without lingering cooking smells. For out-of-reach areas, VELUX INTEGRA® electric and solar roof windows open and close at the touch of a button. The built-in automatic rain sensors will even close the roof windows when it rains.

**The perfect finish for a lighter, brighter home**

VELUX white painted windows help reflect even more daylight into your extension. The bright white finish with discreet wood grain is perfect for living room extensions, while white polyurethane roof windows are maintenance-free, so they’re ideal for humid rooms like kitchen extensions.

*Source: Johnsen et al, 2016*

**For pitched roofs**

VELUX roof windows can bring in TWICE as much daylight* as vertical windows of the same size.

**...and flat roofs**

VELUX curved glass rooflights are perfect for flat roof extensions, letting daylight into the room. Their unique glass-to-edge design prevents water pooling on the surface – so rain runs off and daylight floods in.

*Source: Johnsen et al, 2016*

Our product features at a glance

Our highly engineered roof windows have the latest technology built in. Our research and development teams are continuously refining products to improve performance.

The following features come as standard with all of our roof windows and are designed to make installation and operation easier, as well as ensuring our products look their best.

**Safety glazing prevents glass from falling into your home if broken, and is standard in all of our roof windows (excluding rooflights for uninhabited spaces). Glazing options include noise reduction, privacy and added insulation.**

**VELUX ThermoTechnology™ features high performance materials in the roof window construction. This ensures you save less energy whilst keeping the warmth in your home.**

**The same bracket is used for both recessed and standard installations. A simple red and blue line system shows where the bracket should be installed. You can be confident of a straightforward installation every time.**

**Click-on covers make your installation easier, faster and safer, by reducing the number of screws required on-site.**

**Our maintenance-free, high-quality pivot hinges are designed with innovative technology, ensuring stability.**

**For easy cleaning of the outside pane, the barrel bolt locks the roof window into a 180° position. Now both hands are free for you to clean the outer pane easily and safely from within the room.**

**The unique brushed aluminium ventilation bar makes it possible to let fresh air into your home, even when the roof window is securely closed or when you are away or sleeping, without having to worry about security or bad weather.**

**Click-on covers make your installation easier, faster and safer, by reducing the number of screws required on-site.**

**Our pre-installed, patented mounting brackets come as standard on every new VELUX roof window and fit any of our VELUX blinds, making installation as straightforward as possible.**

**The finishing touch to suit your home**

**THREE INTERNAL FINISH OPTIONS**

Lighter, brighter modern living spaces are more popular than ever. To ensure you have the means to make the most of your project, we offer three internal finish options. All finishes have the same high VELUX quality combined with:

- laminated safety glass as standard
- straightforward installation
- excellent value for money
- full range available and in stock
- short delivery time.

**WHITE POLYURETHANE FINISH**

- Wooden core encased in moisture-resistant white polyurethane. The first choice for humid rooms such as kitchens and bathrooms.
- No visible joints, so dirt can’t accumulate in the corners.
- Maintenance-free, which is ideal for out-of-reach areas.
- Thermally moulded timber core delivers improved insulation.

**WHITE PAINTED FINISH**

- Painted before assembly for a flawless finish and outstanding durability.
- Bright white finish with discreet wood grain matches perfectly with modern interiors.
- Lower maintenance than pine finish roof windows.
- Highly UV resistant, water-based breathable paint to preserve a crisp, bright look.

**PINE FINISH**

- Matches perfectly with traditional interiors.
- Protective triple coat clear lacquer helps to preserve the timber of the window.
Explore the possibilities...

Every VELUX product you choose will do a great job – but before you start, it’s worth considering all the available solutions for the space you are creating. By choosing the right operation, glazing and blinds, you can make a big difference to your project and how the room functions.

**Operation**

- **Centre-pivot**
  Centre-pivot roof windows are operated via the top control bar, making it easy to open, even with furniture below the window.

- **Top-hung**
  Top-hung roof windows are operated by a handle at the bottom and open outwards, allowing you to take advantage of uninterrupted views and a feeling of extra space.

- **VELUX INTEGRA®**
  Ideal for those out-of-reach areas, you can control VELUX INTEGRA® roof windows remotely at the touch of a button. They’re the ultimate choice for fresh air and better indoor comfort.

**Glazing**

- **Safety glazing – 70 pane**
  U-value 1.3 W/m²K
  Laminated safety glazing comes as standard. In case of accidental breakage, this prevents glass falling into your room.

- **Noise reduction glazing – 60 pane**
  U-value 1.3 W/m²K
  The benefits of 70 pane, plus outside noise reduction i.e. traffic, rain and hail, for a perfect night’s sleep. Easy-to-clean coating that repels dust and debris.

- **Energy efficiency glazing – 66 pane**
  U-value 1.0 W/m²K
  Triple glazed unit with enhanced energy efficiency. Anti-dew coating that provides a clearer view by reducing the number of hours dew is present on the glass.

**Blinds and shutters**

- **Energy and duo blackout blinds**
  Energy blinds feature double-pleated blackout fabric for insulation while our duo blinds give you blackout and pleated blinds in one.

- **VELUX INTEGRA® electric and solar operated blinds**
  Enjoy full control of daylight at your fingertips – choose from blackout, roller, pleated and light-dimming energy blinds in a full range of colours.

- **Awnings and shutters**
  VELUX awning blinds provide solar heat reduction in summer while VELUX roller shutters offer additional energy saving and noise reduction with the added bonus of complete blackout.

Find the right window for you at velux.co.uk/configurator
Extension – A beautifully light living space

VELUX INTEGRA® roof windows transformed this room into a stunning, bright and welcoming living space. Now it’s a kitchen with room to cook, entertain and spend time with family. Without roof windows, the original part of this building lacked direct sunlight because light from the vertical patio doors has a limited reach. The result is an ideal space for entertaining and relaxing.

KEY BENEFITS
- Maximises the light in a pitched roof room.
- Fresh air can be controlled.
- Conveniently close all your roof windows at once with just one touch of a button.

Design inspiration
Flat roof extension – Adding the natural daylight you’re looking for

FLAT ROOF EXTENSION
A gloomy flat roof kitchen, that offered very little in the way of natural daylight, was transformed using a VELUX curved glass rooflight. Fresh air and light now flood the space and family members can spend time relaxing, cooking and eating. The curved glass rooflight is out-of-reach, but because it’s a VELUX INTEGRA® electric rooflight, the control is at your fingertips and it can be opened or closed at a moment’s notice.

VELUX RECOMMEND
VELUX CURVED GLASS ROOFLIGHTS
The innovative and unique glass-to-edge curved design creates an elegant and modern look whilst providing all the functional benefits of a traditional dome – giving you the best of both worlds.

Electric operation is recommended to provide ventilation at your fingertips.

KEY BENEFITS
- Glass-to-edge design ensures clear, undisrupted views and ensures rainwater runs off the window.
- Rain sensors feature on all VELUX INTEGRA® flat roof windows, which automatically close in the event of rain.
- Maintenance-free PVC construction with scratch resistant glass.

Bedroom
This bright and airy bedroom was created by transforming an unused loft space. Using multiple VELUX roof windows rather than just one adds a real wow factor, and because they are top-hung, they allow for uninterrupted views.
Replacement roof windows – It’s easier than you think

Give your room a new lease of life by replacing an old VELUX roof window. Our white roof windows are made for modern interiors. Our roof windows can be replaced quickly and easily, it’s simple to update them, giving your room a bright new look. The same standard VELUX sizes are available and they can usually be replaced from inside the room without disrupting the current internal finish.

WHY REPLACE YOUR ROOF WINDOWS?

• For a brighter, contemporary look, switch your old pine roof windows for white ones. White roof windows reflect more light back into the room than darker surfaces.
• Replace your manual roof windows with VELUX INTEGRA® electric or solar roof windows and you’ll be able to open and close them at a touch of a button – perfect for out-of-reach areas.
• In loft conversions, change centre-pivot for top-hung roof windows and enjoy uninterrupted views.

KEY BENEFITS

• Improved insulation means your room will become more energy efficient.
• Can usually be replaced from inside the room without disrupting the current internal finish.
• Same standard VELUX sizes available, but with bigger glazed area, meaning more daylight in your home.
• Replaced in as little as four hours.

DID YOU KNOW?

Replacement flashings allow old roof windows to be replaced without disturbing the interior lining.

HAVE YOU CONSIDERED?

Upgraded glazing
Including noise reduction, privacy and added insulation.

VELUX BLINDS

We have a range of blinds featuring an array of designs and finishes – and our PICK&CLICK!™ system means they can be fitted in minutes.

VELUX bundles
All you need for a perfect project

A successful job comes down to choosing the right materials and fittings. So it’s important to specify everything you need at the outset to get it right first time. To help you, we’ve selected the optimal products for key projects, shown here as bundles, making it easier to order and ensuring you get everything you need. The handy price chart makes managing your budget easier too.

Loft bundle – perfect for bedrooms

Light is a big consideration in bedrooms. On the one hand you want a bright and airy room, but most people like a darker room for a good night’s sleep, so these bundles combine a blackout blind with your choice of roof window.

FLAShING - Marries the roof window to the roofing material. Available for either slate or tile roofs, for roof pitches between 15-90° for centre-pivot and 15-55° for top-hung roof windows.

INSTALLATION PRODUCTS – Ensures a well-insulated and weather-tight installation. The kit features an insulation collar, transverse drainage gutter and underfelt collar.

TOP-HUNG WHITE PAINTED ROOF WINDOW – Ideal for when the roof window is set higher in the roof pitch or above furniture. Includes noise reduction glazing to reduce airborne and rain noise for a restful sleep. TIP: Extra roof windows create an airy and bright room.

CENTRE-PIVOT WHITE PAINTED ROOF WINDOW – Ideal for when the roof window is set lower in the roof pitch or among furniture. Includes noise reduction glazing to reduce airborne and rain noise for a restful sleep. TIP: Extra roof windows create an airy and bright room.

BLACKOUT BLIND – Fabric offers complete blackout for darkness, ensuring a good night’s sleep. Install your blind in minutes with our unique Pick&Click™ system. Available in 2 colours.

Duo BLACKOUT BLIND – Our duo blind combines blackout and pleated blinds in one. Install your blind in minutes with our unique Pick&Click™ system.

**Operation**

**ELECTRIC**
- Ideal for out-of-reach areas.
- Control at your fingertips and provide fresh air.
- Rain sensors feature on all VELUX INTEGRA® roof windows, automatically closing in the event of rain.
- Works together with VELUX ACTIVE for a smarter way to achieve a healthier indoor climate.

**SOLAR POWERED**
- All the same features as VELUX INTEGRA® electric roof windows, but powered by the sun.
- PV solar cell on external window frame requires exposure to sunlight.

**Notices**

- All roof windows have a delivery time of 2 days except '66' pane windows and GGU 006030 which are 11 days.
- Delivery time is working days from receipt of orders placed before 4pm (UK) and 3pm (NI).
- Anti-dew coating reduces number of hours external condensation is present.

---

**Features**

- Ideal for out-of-reach areas.
- VELUX INTEGRA® roof windows control air flow and provide fresh air.
- Fully integrated motor runs almost without a sound.
- Rain sensors feature on all VELUX INTEGRA® roof windows, automatically closing in the event of rain.
- Works together with VELUX ACTIVE for a smarter way to achieve a healthier indoor climate.
Sensor-based ventilation
Smart sensors monitor temperature, humidity and CO₂ levels, allowing VELUX ACTIVE to intuitively open and close your VELUX INTEGRA® products.

Safe and secure
Tap the departure switch on your way out of the house to close your VELUX INTEGRA® products. This will leave them in the second ventilation position – for security and peace of mind.

Control from your smartphone
The VELUX ACTIVE app means you can operate your VELUX INTEGRA® products yourself from anywhere in the world – putting you in complete control.

Voice activation option
Apple HomeKit® compatibility lets you use voice control to operate your VELUX INTEGRA® products for complete convenience.

VELUX ACTIVE works together with your VELUX INTEGRA® electric or solar roof windows, blinds, and shutters, adjusting them automatically so your family enjoys a healthier indoor climate.

Easy installation
Designed to be installed quickly and easily by homeowners – if you already have VELUX INTEGRA® products, the VELUX ACTIVE kit comes with everything you need to install the system yourself.

The kit includes:
- VELUX ACTIVE indoor climate sensor
- VELUX ACTIVE departure switch
- VELUX ACTIVE gateway

Interprets the information from the indoor climate sensors and instructs the VELUX INTEGRA® products to open or close.

Additional components:
Extra components can be purchased separately if you have more than one room with VELUX INTEGRA® products – or would like a departure switch for each exit door.

VELUX roof windows
VELUX conservation roof windows

For traditional buildings

When planning dictates that a window of traditional external appearance is required, conservation roof windows should be considered. All of our conservation roof windows have the same technical features of a VELUX roof window but in a traditional black conservation style.

Conservation frame size:

- Available in either centre-pivot or top-hung.
- Black external profiles and glazing bar.
- Recessed installation for slate and tiled roofs.
- Top-hung roof windows listed below are suitable for emergency escape.
- Other sizes and glazing options available – contact us for further information.

Conservation packages include:
• Roof windows with laminated glazing as standard for safety.
• Recessed flashings available for a more streamlined external appearance.
• Insulation collar and underfelt collar provided for a weather-tight and energy-efficient installation.

The requirements from conservation officers throughout the country differ and the black finish featured within our conservation roof window packages may not be required in your area. Consult your local conservation officer and find out if you can create a traditional appearance by adding glazing bar to a standard VELUX roof window with grey exterior. This will allow you to take advantage of all roof window styles and sizes available (except triple-glazed roof windows).

Optional glazing bars for standard VELUX roof windows

The addition of a glazing bar, your local conservation officer may request that your roof window be installed deeper into the roof than can be achieved with a standard installation. To do this you should select a recessed flashing kit, which will provide a sleek, streamlined finish as less of the roof window protrudes above the roofline. Recessed flashings are also available with insulation and underfelt collars and are recommended for optimum energy efficiency.

Grey glazing bars are also available for standard VELUX roof windows.

Recessed flashing

As well as the addition of a glazing bar, your local conservation officer may request that your roof window be installed deeper into the roof than can be achieved with a standard installation. To do this you should select a recessed flashing kit, which will provide a sleek, streamlined finish as less of the roof window protrudes above the roofline. Recessed flashings are also available with insulation and underfelt collars and are recommended for optimum energy efficiency.

To create your grey conservation package

- Select your preferred VELUX roof window. This includes white painted, white polyurethane, pine and all operating methods (pages 26-33).
- Choose a flashing kit suitable for your specific roof pitch and roofing material – a recessed flashing kit is recommended (pages 56-57).
- Add one or more conservation glazing bars in the corresponding size to your roof windows. We recommend the use of two glazing bars for our wider roof windows such as SK06, UK04 and UK08.
- Grey glazing bar to match grey exterior (nearest RAL 7043) finish of standard VELUX roof windows.

Our full range of recessed flashings is available as part of our conservation roof window packages and help you comply with local conservation requirements.

To create your grey conservation package

• Select your preferred VELUX roof window. This includes white painted, white polyurethane, pine and all operating methods (pages 26-33).
• Choose a flashing kit suitable for your specific roof pitch and roofing material – a recessed flashing kit is recommended (pages 56-57).
• Use VELUX installation products for optimum energy efficiency (pages 56-57).
• Add one or more conservation glazing bars in the corresponding size to your roof windows. We recommend the use of two glazing bars for our wider roof windows such as SK06, UK04 and UK08.
• Grey glazing bar to match grey exterior (nearest RAL 7043) finish of standard VELUX roof windows.

Grey glazing bars are also available for standard VELUX roof windows.

VELUX CABRIO® balcony

Transforms from a roof window into a balcony in seconds.

- The VELUX CABRIO® balcony transforms from a roof window into a balcony in seconds. This is a great way to add real wow-factor to a property.
- The upper section is top-hung and opens outwards whilst the bottom section unfolds into a glazed balcony with side railings.
- Can be easily combined with additional top-hung and fixed sloping roof windows to increase the daylight and view.
- Made of high-quality white painted natural pine.
- Two sizes available providing you with more space to enjoy the outdoors, indoors.
- Featuring triple glazing as standard which contributes to an energy efficient installation.
- The glazing has a toughened outer and a laminated inner pane for additional safety.
- Double and triple units include EKY (100mm) support trimmers.
- Easy-to-clean coating on the toughened outer pane keeps the glazing cleaner for longer.
- Top-hung section rotates 180° and locks in to place for easy cleaning of the outer pane.
- Other combinations available – contact us for further information.
- VELUX blinds are available for this product see veluxblindsdirect.co.uk

*All roof windows have a delivery time of 7 days*
*Delivery times are working days from receipt of orders placed before 4pm (UK) and 3pm (NI)*

*Anti-dew coating reduces number of hours external condensation is present.
Sloping and vertical combinations

Combine sloping and vertical white painted or white polyurethane roof windows to expand your view and increase daylight. Ideal for one and a half storey properties.

Follow the steps to find the best solution for your room:

1. Decide on your combination – single, twin or triple.
2. Select your white polyurethane or white painted roof windows in size MK04, MK06 or MK08 (prices not included). Choose from:
   - Centre-pivot – see pages 26-27
   - VELUX INTEGRA® – see pages 28-29
   - Top-hung – see pages 32-33.
3. Select your bottom vertical element(s) – size MK31 or MK35. The white painted vertical element is bottom-hung and opens inwards for added ventilation and cleaning. The white polyurethane element is fixed.
4. Select the appropriate flashing system for your roof window size, combination and roofing material.
   - If selecting twin or triple combinations, we recommend the use of an EBY trimmer for added support and a harmonious internal finish.
   - Other combinations can be created – contact us for further information.

Sloping and fixed combinations

Multiple VELUX roof windows create panoramic, light-filled rooms. By combining VELUX roof windows you can add great panoramic views and more natural light to give your home its own unique character. If the pitch of your roof continues to the floor, you can extend your VELUX roof window by installing an additional window element, GIL (maintenance-free white polyurethane) or GIL (white painted) below. These windows have a fixed sash that cannot be opened. Follow the steps below to find the best solution for your room:

1. Decide on your combination.
2. Select your opening roof window(s) in size MK04, MK06, MK08, PK08 and PK10 (prices not included). Choose from:
   - Centre-pivot – see pages 26-27
   - VELUX INTEGRA® – see pages 28-29
   - Top-hung – see pages 32-33.
3. Select your bottom fixed element(s) – size MK31 or MK35.
4. Select the appropriate flashing system for your roof window size and roofing material. Other combinations can be created – contact us for further information.

1. All roof windows, single flashings and trimmers have a delivery time of 7 days except VFE 2060 windows, VFE 2066, and twin and triple flashings which are 26 days.
2. Delivery time is in working days from receipt of orders placed before 4pm (UK) and 3pm (NI).
VELUX curved glass rooflight

The stylish solution

The VELUX curved glass rooflight is the ideal choice for homeowners with 0-15° roof pitches.

The curved glass top unit consists of 6mm scratch-free glazing with a glass-to-edge design, meaning a clear external pane is left for a better view.

The innovative and unique design of the curved glass top cover provides optimal functionality and creates a simple and modern look inside and out. The flat roof window consists of a high insulation, PVC-construction and an integrated 2-layer low-energy pane. The electrically vented option comes with VELUX INTEGRA® automated operation.

The VELUX curved glass rooflight features excellent noise reduction in case of rain, hail or other exterior disturbances. Blinds are available for daylight control and an awning blind for heat protection.

• Elegant solution for externally visible installations.
• Glass-to-edge construction allows for a clear, uninterrupted view.
• Low maintenance due to curved glass allowing rain to run off.
• 3-layer glass construction ensures optimal energy performance.
• Scratch-free glass prolongs the unit’s expected lifetime.
• Hassle-free installation in 0-15° roof pitch.

For pricing see page 43
VELUX flat glass rooflight

VELUX flat glass rooflights are a stylish addition to our flat roof window range – featuring an attractive eye-catching glass pane, making it an alternative to the classic domed VELUX flat rooflight.

Convenience and high performance

As well as an innovative design, the flat glass rooflight features all of the outstanding specifications you’d expect from VELUX:
- It requires minimum maintenance as it comprises a maintenance-free PVC framework and lacquered aluminium cladding.
- It is highly energy efficient. Our high-performance insulation is integrated into the frame to give the best possible protection against heat loss.

Fixed rooflight

The VELUX fixed flat glass rooflight can transform any space and is ideal where there is a need for bringing in a great deal of natural daylight without adding extra ventilation. This double glazed unit has a laminated inner pane for additional safety.

Electrically operated rooflight

The VELUX vented flat glass rooflight provides ventilation and fresh air through the roof, and it can be operated automatically with the VELUX INTEGRA® remote control.

Special consideration for applications below roof pitch 5°:
If installed below 5°, there is an increased risk of water, dirt and debris standing on the glass, which in some cases, over time can cause slight discoloration of the glass. Installation of flat glass below 5° does not affect the lifetime and quality of the product compared to installation at 5°.

Roof pitch

2°-15°

VELUX curved and flat glass rooflight

Options and pricing

1. CHOOSE YOUR TOP COVER

Curved glass (ISD 1093)
- Curved glazing and glass-to-edge design ensures uninterrupted drainage
- Curved shape ensures a clearer view to the sky
- Up to 6mm scratch-free glazing
- Installation in 0-15° roof pitch
- Recommended option for visible installations

Flat glass (ISD 2093)
- Flat glass design fits the roof line
- 4mm scratch-free glazing
- Installation in 2-15° roof pitch

2. NOW CHOOSE A BASE UNIT

ELECTRICALLY OPERATED BASE UNIT (CVP)
- High-insulated PVC sash construction
- 2-layer low-energy pane
- Laminated pane on the inside
- VELUX INTEGRA® convenient operation
- Integrated rain sensor for automatic closing during rain

FIXED BASE UNIT (CFP)
- High-insulated PVC sash construction
- 2-layer low-energy pane
- Laminated pane on the inside

### Options and pricing

#### VELUX flat roof domes

- Clear or obscure polycarbonate cover.
- Excellent insulating value and sound reduction.
- Note: this product is not compatible with VELUX flat roof blinds FMG, FDX, FMP, and MSG.

### Flat roof kerb

**All the benefits of a VELUX roof window in a flat roof.**

- Insulated timber kerb to allow the installation of a standard VELUX roof window into a flat roof.
- Select the insulated timber kerb to match the size of your roof window.
- Allows you the flexibility to select the most appropriate type of roof window for your application such as white polyester finish or VELUX INTEGRA®.
- Roofing material is dressed up the sides of the kerb, then overlapped with the aluminium cover parts.
- Refer to pages 26-33 for info on roof windows.
- Roof window not included.

VELUX Modular Skylights
Open up your home to more natural light

Why VELUX Modular Skylights?
VELUX Modular Skylights are specially designed to bring more natural light into modern, flat roof homes and extensions. Modularity allows you to design with daylight over larger roof expanses, with an end result that blends more with the surroundings.

Unique design
Developed in collaboration with renowned architects Foster + Partners, VELUX Modular Skylights offer a slim profile design which is great for modern homes that need to make most of the daylight. Electrics and motors within vented modules are concealed, creating a simple and refined look, inside and out.

Light up the rooms in your home
The kitchen is the heart of the home, and the range of activities we enjoy there means that the lighting must meet everyone’s needs – whilst also keeping the room looking good, morning, noon and night.

With VELUX Modular Skylights, the light enters directly from above, right into the centre of your room. This is a much stronger source of illumination than limited light coming from your vertical windows.

For further inspiration visit velux.co.uk/vmsdomestic

Prices from £1,417 ex VAT.
For more details, call 01592 778 941 or contact vms@velux.co.uk
Choosing your sun tunnel

- We recommend rigid sun tunnels for maximum light.
- Recommended tunnel length for a rigid sun tunnel is 0.9 - 6.0m.
- Recommended tunnel length for flexible sun tunnel 0.4m - 1.5m (pitched roof) and 0.2 - 0.9m (flat roof) in cases where an obstacle may prevent the use of a rigid tunnel.

Pitched roof sun tunnels

- Exterior flat glass window appearance.
- Easy-to-clean coating keeps glass cleaner for longer.
- Easy to install with integral flashing.
- Double layer diffuser with Edge-Glow technology increases the spread of light internally.
- Can be used for night time lighting with an optional low energy light kit.

Flat roof sun tunnels

- Available in 14" flexible tunnels.
- White PVC kerb with clear polycarbonate domes.

### Smoke ventilation system and rooflights for uninhabited spaces

**Roof pitch 15°-90°**

Available for 1m² (SK06 size) or 1.5m² (UK08 size) of smoke-free ventilation area.

- Maintenance-free, white polyurethane, centre-pivot roof window.
- For geometric smoke ventilation our systems are tested and certified to EN ISO 12101-2 for roof pitches between 15°-90°.
- For aerodynamic smoke ventilation our systems are tested and certified to EN ISO 12101-2 for roof pitches between 15°-60°.
- Comes with laminated inner pane for additional safety.
- System can be upgraded to comply with aerodynamic smoke ventilation requirements by the inclusion of the optional KFD external wind deflector.
- Other sizes available, contact us for further information.

**Roof pitch 20°-65°**

- Frame and integrated flashing made of maintenance-free polyurethane.
- Operated using a handle with three ventilation positions.
- Extruded aluminium sash which can be hinged on both sides, opening to an angle of 90°.
- Opening restrictor which engages at 90° only.
- Black internal and external finish.

Replacing existing roof windows

Replacing your roof windows is quick and straightforward

It’s time for a change. Let in more daylight, create more comfort and increase energy efficiency.

Think bigger
Replacing a roof window is the perfect opportunity to bring even more light in. You’d be surprised how much brighter a room can become if you make the roof window even slightly bigger. Or that by adding a second roof window to the one you are replacing, you get twice the daylight.

We have provided the same range of roof window sizes for the last 40 years, so it is usually very easy to find a direct size match.

- Minimal disruption as roof windows are replaced in the existing aperture.
- Replacement installations can typically be carried out in a day.
- Work can usually be carried out from the inside.

Always improving
We continuously work towards improving our products and energy efficiency.

- Improved thermal performance and sound reduction for greater comfort.
- More attractive design and better integration into the roof.
- Larger glazing areas allowing more daylight in.
- Improved air tightness and insulation around the roof window due to insulation collar.
- Upgrade to a white finish or VELUX INTEGRA® electric or solar remote operation.
- VELUX INTEGRA® solar powered roof windows are ideal for replacing older roof windows as no wiring is required.

Save time and money with VELUX replacement flashings
EL and EW single replacement flashings are essential for replacing older VELUX roof windows manufactured before April 2001 with a current roof window while maintaining the original installation level of the roof window.

This allows old roof windows to be replaced without disturbing the interior finish of the room, saving you a lot of work. If you were to use a standard flashing you would need to re-do the internal lining around the roof window.

EL 6000 and EW 6000 have a delivery time of 2 days.
All other replacement flashings have a delivery time of 7 days.
Delivery time is in working days from receipt of orders placed before 4pm (UK) and 3pm (NI).

EL and EW single replacement flashings are essential for replacing older VELUX roof windows manufactured before April 2001 with a current roof window while maintaining the original installation level of the roof window.

This allows old roof windows to be replaced without disturbing the interior finish of the room, saving you a lot of work. If you were to use a standard flashing you would need to re-do the internal lining around the roof window.

EL 6000 and EW 6000 have a delivery time of 2 days.
All other replacement flashings have a delivery time of 7 days.
Delivery time is in working days from receipt of orders placed before 4pm (UK) and 3pm (NI).
### Upgrading existing roof windows

Improve the functionality of existing roof windows with automated solar operation.

**Opening operation**

**SOLAR POWERED**
- All the same features as VELUX INTEGRA® (page 28) electric roof windows, but powered by the sun.
- PV solar cell on external window frame requires direct exposure to sunlight.
- No need to plug into a power supply, making installation even quicker, easier and no need for redecoration.

**For a smarter, healthier home**

We have partnered with revolutionary smart home company NETATMO to bring you a brand new way to control your home’s indoor climate. You can choose VELUX ACTIVE to work alongside your VELUX INTEGRA® products. Smart sensors measure temperature, CO2 and humidity levels, then the system reacts to operate your VELUX INTEGRA® products—adjusting them automatically to provide the right level of ventilation. VELUX ACTIVE is the smarter way to achieve a healthier indoor climate.

Find out more on pages 30-31 and watch the film at velux.co.uk/active

---

### Upgrading glazing

Advances in pane technology allow the upgrading of existing glazing units to provide better heat and sound insulation properties. All panes are AA fire rated.

**For roof windows manufactured after April 2001**

Installation products

Building regulations relating to insulation and air-tightness of roof window installations have become more stringent. We have not only developed a range of installation products to help make it quick and easy for you to be compliant, but the range also offers increased energy efficiency and a safe installation.

Vapour barrier – BBX
- Helps prevent condensation from forming in the roof construction.
- Complete vapour barrier collar, fully welded in all corners.
- A fully welded rubber gasket with a double pressure seal guarantees speedy installation and a vapour and air tight solution.
- Reinforced corners for extra security against perforation.
- VELUX installation tool helps fit the collar in a matter of minutes.

Insulation collar – BDX
- Insulates around the roof window frame, reducing heat loss and eliminating cold bridges.
- Makes insulating and installing the roof window a simple process.
- Supplied with BFX underfelt collar.
- Made to all standard roof window sizes.
- Click fittings ensure fast and accurate assembly.

Roof window
- The performance of your selected VELUX roof window is optimised by the use of installation products.
- All VELUX roof windows are compatible with VELUX installation products.
- Simply select your desired size, style and glazing option.

Underfelt collar – BFX
- Ensures a weather-tight seal between the roof window and the roof.
- Can also be purchased separately from the insulation collar (BDX).
- Pleated material ensures a flexible and tight seal to the underfelt of the roof, whatever its construction.
- Made from diffusion open material to minimise risk of condensation.
- Comes with transverse drainage gutter to lead water away from the head of the roof window if a tile or slate is broken above the window.
- Welded corners ensure a watertight and simple installation.

Flashing
- Marries the roof window to the roofing material and ensures a weather-tight seal.
- Standard VELUX flashings are compatible with VELUX installation products.

For use of installation products with recessed flashings, see packages on page 59.
Flashings

We provide a range of flashing options to suit your roofing material. The information below will help you to select the most appropriate flashings for your installation.

EDN / EKN

- Recessed flashings for installing roof windows into slate up to 8mm thick.
- EDN 2000 Includes BDX 2000F insulation package as standard.
- Not for interlocking slate.

EDJ / EKJ

- Recessed flashings for installing roof windows into flat or profiled roofing material up to 90mm in profile.
- EDJ 2000 Includes BDX 2000F insulation package as standard.

EDL / EBL / EKL

- Flashings for installing roof windows into slate up to 8mm thick.
- Not for interlocking slate. See EDW for details.

EDW / EBW / EKW

- Flashings for installing roof windows into flat or profiled roofing material up to 120mm in profile.
- Also for interlocking slate, thatch and profiled sheeting.
- Our EDW flashing suits virtually every installation and supersedes EDZ as our standard tile flashing.

EDP / EBP / EKP

- Flashings for installing roof windows into plain tiles (max length 300mm).
- Maximum thickness of 14mm.

# Recessed and standard flashings

Recessed flashings

Recessed flashings provide a sleek and streamlined finish as the roof window is installed deeper into the roof structure (see image above), meaning that less of the roof window protrudes above the roofline.

- We recommend BDX insulation collar and BFX underfelt collar, included in EDN and EDJ 2000, for optimum energy efficiency.
- Recessed installation height – install the brackets at the sides of the roof window frame, at the blue line level.

Standard roof window flashings

We provide a range of flashing options to suit your roofing material. The table below will help you to select the most appropriate flashings.

Standard installation height – install the brackets at the top and the bottom of the window frame, at the red line level.

## Compatibility

To find out more about the compatibility of roofing materials and flashings, and to learn more about different installations (such as thatch and interlocking slate tile), please go to velux.co.uk/flashings

## Opening sizes

Opening sizes depend on the flashings used. Instructions available online.

## Reccessed flashings

**Featured EDN/recessed tile installation**

**Featured EDJ standard tile installation**

## Standard roof window flashings

**EDN, EDJ, EDL and EDW 2000 variants come with installation products included.**

How to select your blinds

1. **Select type**
   Choose an interior and/or exterior VELUX blind or shutter that meets your requirements in terms of heat protection, blackout, light adjustment or insect protection.

2. **Select colour and design**
   Our blinds are available in an array of exciting colours and designs.

3. **Select operation method**
   Choose between manual or automatic operation. Always consider electrically-operated products for out-of-reach areas.

4. **Select the right size**
   Check the data plate which displays the type and size of your roof window – you must match the blinds you order to this information. See the chart below for more details.

5. **Installed in minutes**
   VELUX interior blinds are easily installed with our unique Pick&Click!™ system. Follow the instructions, and your blinds will be fitted in minutes.

### Sizing chart

**It’s simple to make sure you order the right size of blind:**

- Check your roof window’s data plate, then use the SIZE CODE to find its measurements on the chart below.
- Now you can check the price of your chosen blind on the following pages.
- Make sure you use the SIZE CODE on your roof window’s data plate when ordering your blind at veluxblindsdirect.co.uk

### Installed in minutes

VELUX interior blinds are easily installed with our unique Pick&Click!™ system. Follow the instructions, and your blinds will be fitted in minutes.

**New VELUX roof windows are fitted with pre-installed brackets to ease installation and to ensure a perfect fit every time.**

Duo and blackout blinds

Blackout blinds

The VELUX Blackout blind offers complete blackout for darkness anytime. Ideal for installing in bedrooms to ensure a good night’s sleep.

- OEKO-TEX® certified.
- Available in 24 colours.
- Stepless positioning.
- Fabric offers complete blackout.
- Softly diffuses incoming daylight.
- Protects against cold from the outside.
- No visible cords.
- Upgrade from blackout to duo blackout for £22 ex VAT

Duo blackout blinds

The VELUX duo blind is a blackout blind and a pleated blind in one. It offers the best of both worlds: blackout at any time and softly diffused natural light all day.

- Fabric offers complete blackout.
- Stepless positioning.
- Flat and pleated cloth.
- Available in 24 colours.
- Softly diffuses incoming daylight.
- DEKO-TEX® certified.

Blackout energy blinds

- Fabric offers complete blackout.
- Stepless positioning.

Children’s collection

Disney & VELUX Goodnight Collection

Make bedtime full of wonder

The new Disney & VELUX Goodnight Collection is our latest range of blackout blinds designed for kids. Inspired by their favourite characters from Frozen, Cars and Winnie the Pooh, night time has never been so much fun.

Our themed blinds will spark their imagination while they play during the day and because the fabric offers total blackout, they’ll enjoy restful sleep too.

• 99.9% blackout – the best on the market!
• Install in minutes with the unique VELUX Pick&Click™ system.
• OEKO-TEX® certified – no harmful substances.
• Slimline design integrates perfectly with VELUX roof windows.

Find the collection at veluxblindsdirect.co.uk

© Disney. © Disney/Pixar. © Disney. Based on the “Winnie the Pooh” works by A. A. Milne and E. H. Shepard.

Please note: as with all fabrics, the precise colours may vary from the printed samples. Designs shown for illustration purposes only. The blind may differ due to the fact that each design is scaled to match the specific window size.

Blinds and Accessories
Venetian blinds

The VELUX Venetian blind gives you complete control of the light and is the ideal solution for rooms where you want to adjust the amount and direction of incoming light. As the blinds are made of aluminium they are also very easy to wipe clean and an ideal solution for rooms with high levels of humidity, such as kitchens and bathrooms.

- Complete light control
  Controllable amount and direction of incoming light and shadow.
- Award-winning design
  Praised for the unique tilt mechanism and cordless operation.
- Colours
  Choose from 9 colour choices.

Use the SIZE CODE to order – check the sizing chart on page 63.

Electrically powered products combined with a manual VELUX roof window require a control unit KUX 110. Refer to page 73 for details.

All blinds and shutters have a delivery time of up to 7 days except the Roman blind (FHB) which is 12 days.

Delivery time is in working days from receipt of orders placed before 4pm (UK) and 3pm (NI).
### External awning blinds and shutters

**External awning blinds**

The VELUX awning blind is an external blind perfectly suited to stop strong sunlight and heat before it reaches the pane on your roof window. These unique blinds are ideal for keeping rooms cool and reducing the heat of the sun on hot summer days.

- **Sun yes, heat no**
- **Reduce heat by up to 73%**
- **Quality**
- **Easy installation**
  - Installs from the inside in minutes.
- **Upgradable**
  - Available in electric and solar powered operation.

**Roller shutters**

Complete light control
- Keeps out the light and prevents overheating.
- **Energy saving**
  - Provides insulation in cold weather.
- **Security**
  - Provides additional security and protection from the elements.
- **Upgrade**
  - Available in electric (for use with VELUX INTEGRA® electric roof windows) and solar (for use with solar or manual roof windows).
- **Sound reduction**
  - Provides additional sound insulation against rainfall and hail.
